Thank you for choosing us.

We are an established business who focus exclusively on providing Access Audits for Schools in the UK, from Nursery Schools to Primary and Secondary Schools in all educational sectors.

We advise you on how to make 'reasonable' adjustments to your school. This does not always need to be costly. We identify obstacles to access, look at the options for removing these, and make clear recommendations to you.

Since setting up Equality Act Audits in 2010, we have undertaken Access Audits in the UK on over 2500 schools, helping them with their accessibility plans and SEN policies, advising Headteachers and SENCOs on 'reasonable adjustments' to be made to comply with the Equality Act 2010.

SEN Policy

We can also provide a detailed and bespoke SEN policy for your school, should you need one. We will liaise with your SENCO to establish the present needs of your pupils and the resources you have available. Please contact us for a quotation.

1. Executive Summary

An on-site Accessibility Audit of Allens Croft Nursery School took place on **25/03/2026**.

Further information was obtained from the school website, a review of all published policies and by the completion of our Pre-Audit Questionnaire.

Accessibility and Equality legislation as it applies in schools is summarised in Sections 2 and 3 below. The public sector Equality Duty came into force on 5 April 2011. The Equality Duty ensures that all public bodies play their part in making society fairer by tackling discrimination and providing equality of opportunity for all. Under the equality duty, they are required to publish relevant information regarding their compliance with the duty, and to set and publish equality objectives. Their Equality Objectives along with a summary of the way in which they respond to this duty are included on their website. They publish information relating to their compliance with the duty in the head teachers report to the governors, so that governors can critically review the extent to which they meet the aims of the duty. Contextual background information is summarised in Section 7. The school context is considered when suggesting recommendations for improvements to accessibility.

The constraints and limitations to the audit are considered in Section 8.

The detailed Access Audit follows in Section 10 and is summarised in Section 1.1 below. The Audit section describes accepted best practice where appropriate.

Based upon the audit findings, the suggested School Accessibility Plan together with a suggested Action Plan, is provided at Sections 11 and 13 respectively.

This Accessibility Plan contains relevant and timely actions to:- Increase access to the curriculum for pupils with a physical disability and/or sensory impairments, expanding the curriculum as necessary to ensure that pupils with a disability are as equally prepared for life as the able-bodied pupils; (If a school fails to do this they are in breach of their duties under the Equalities Act 2010); this covers teaching and learning and the wider curriculum of the school such as participation in after-school clubs, leisure and cultural activities or schools visits – it also covers the provision of specialist or auxiliary aids and equipment, which may assist these pupils in accessing the curriculum within a reasonable timeframe.

Allens Croft Nursery School welcomes families seeking high-quality early education and childcare. The school offers both FREE (Local Authority funded) and paid places for children aged 2–4, supporting them in their development before they move on to Primary and Special Schools. It operates Monday to Friday, from 8:00am to 5:00pm, for up to 48 weeks each year.

As one of nine Local Authority Nursery Schools within the Birmingham Federation of Maintained Nursery Schools—and one of 27 across the City of Birmingham—Allens Croft provides a rich early years experience led by a shared leadership team of fully qualified teachers (QTS) and experienced early years professionals.

The school is known for its creative and holistic approach to early learning. Its ethos encourages children to make choices, build confidence, and develop independence, motivation, and self-discipline. Principles of participation, negotiation, and collaboration underpin daily practice, helping children gain knowledge, skills, and respect for others. Every aspect of the provision is child-centred and designed to support both children and their families within the wider community.

Allens Croft Nursery School offers a warm, welcoming, safe, and inclusive environment. Each age group benefits from purpose-built facilities and spacious outdoor areas where children can explore, play, laugh, and learn together.

At Allens Croft Nursery School, the team believes that every child deserves equal access to high-quality education within an inclusive and supportive environment. The school's Accessibility Plan reflects its commitment to ensuring that all learners—regardless of physical, sensory, cognitive, or emotional needs—receive the resources and adjustments required to thrive academically, socially, and personally.

As part of its dedication to fostering an inclusive community, the school has carried out a comprehensive review of its facilities, curriculum, and support services. The Accessibility Plan sets out the targeted actions the school will take to improve accessibility for pupils with disabilities. These measures span multiple areas, including physical access to buildings and classrooms, adaptations to teaching methods and learning materials, and the provision of specialised support services.

Working closely with students, families, staff, and external specialists, the school has identified key priorities and developed practical strategies to address them. Its overarching aim is to create an environment where every child feels valued, supported, and empowered to achieve their full potential. By placing accessibility at the heart of its practice, Allens Croft Nursery School seeks not only to meet statutory requirements but also to nurture a culture of inclusivity, respect, and belonging throughout the school community.

SEND at Allens Croft Nursery School

Allens Croft Nursery School is deeply committed to inclusion and believes that every child is entitled to a high-quality education where their individual needs are understood and supported. The nursery ensures that all children, including those with special educational needs and disabilities (SEND), are given the opportunity to participate fully in school life and access a broad, balanced and meaningful curriculum.

The school is recognised for its skilled and passionate approach to supporting children with SEND, offering tailored provision that enables each child to thrive academically, socially and emotionally. With a clear focus on transparency, Allens Croft aims to empower families by helping them make informed decisions about the support and services available to their child. The environment is carefully designed so that all children feel safe, valued and able to flourish.

The nursery's named SENCO, Sarah Roberts, leads the coordination of SEND provision and works closely with families, key workers and external agencies. Each child is supported by a dedicated key person who develops a thorough understanding of their needs and maintains open, regular communication with parents and carers. Families are actively involved in setting learning targets, reviewing progress and shaping their child's individual support plan.

Allens Croft Nursery School ensures that all children, including those with additional educational or medical needs, participate in a differentiated, engaging curriculum delivered by qualified staff. Children benefit from whole-class activities, small-group learning and one-to-one support where required. The school adapts its environment, resources and teaching methods to meet children's specific needs, ensuring that families are kept informed about any changes made.

A wide range of strategies are used to enhance children's learning, including visual timetables, Makaton signs, symbols and other communication tools. The nursery has strong expertise in autism practice, with a lead practitioner trained to AET Level 3 and most staff trained to AET Level 1. Staff regularly undertake further professional development in areas such as speech and language support, well-being and self-esteem, and visit other settings to strengthen their practice.

Partnership with families is at the heart of the school's SEND approach. Allens Croft works collaboratively with parents and specialist services—including Speech and Language Therapists, Paediatricians, Child Development Centres, the Communication and Autism Team, Educational Psychologists, Community Nurses and Health Visitors—to ensure every child receives the most

appropriate, targeted support. Staff are trained annually to administer asthma medication, use EpiPens and support children with epilepsy.

Through its inclusive ethos, skilled staff and strong partnerships, Allens Croft Nursery School creates an environment where every child is supported to reach their full potential and experience success in their early years.

Access to the Building

In a school setting, “access to the building” refers to ensuring that all students, staff, and visitors can enter, move around, and use the facilities without facing any physical barriers. Allens Croft Nursery School actively manages and enhances its building and grounds to meet the needs of current disabled pupils as well as those who may join in the future. The school also considers the needs of any staff members with disabilities and makes necessary adjustments as they arise. To support this commitment, physical accessibility is reviewed annually.

Allens Croft Nursery School is designed to be fully accessible to all users, including those with mobility, sensory, or other physical needs. The school provides wheelchair access through the main entrance, and the doorways and corridors are wide enough to allow easy movement for wheelchair users and individuals using other mobility aids. Accessible toilet facilities equipped with handrails are available, and designated accessible parking spaces are located close to the entrances to support ease of arrival and departure. The site also accommodates drop-off by taxis or other transport where required.

Additional accessibility features support a wide range of needs. Classrooms are equipped with blinds and curtains to reduce glare, and students who require them have access to low-vision aids, specialist equipment, or adapted furniture. Regular and frequent access to specialist support further ensures pupils’ individual needs are met. Clear and visible signage is used throughout the building to direct users to key areas, including accessible routes and facilities. Emergency exits are also designed to be fully accessible, enabling all individuals to evacuate safely in an emergency.

These features reflect the nursery’s strong commitment to providing an inclusive, welcoming, and accessible environment for every member of its community.

Access to the Curriculum

In early years settings such as Shenley Fields Nursery School, staff have a responsibility to ensure that every child can take part in learning. This means making thoughtful adaptations to the environment, routines, and learning experiences so that all children—whatever their individual needs—can be included and supported.

An inclusive nursery curriculum can be created in many ways, including:

- **Adapted Teaching Approaches:** Staff adjust how activities are introduced and supported so that all children can take part at their own level.
- **Flexible Learning Environments:** Rooms and outdoor areas are arranged so children with a range of physical, sensory, or emotional needs can access them comfortably and safely.
- **Use of Supportive Tools:** Simple resources—such as visual timetables, sensory equipment, adapted seating, or communication aids—help children participate more fully.
- **Teamwork Among Staff:** Practitioners, key workers, SEN specialists, and support staff work together to provide consistent, targeted help for children who need it.
- **Multisensory Learning:** Activities offer a mix of seeing, hearing, moving, and exploring to support different learning styles and developmental stages.

- **Accessible Materials:** Storybooks, play resources, and activity materials are adapted when needed—for example, with simplified language, enlarged print, or tactile elements.
- **Celebrating Diversity:** Staff use stories, images, and play experiences that reflect the backgrounds and cultures of all children in the nursery community.
- **Inclusive Practice:** Group activities, play invitations, and routines are planned so every child can join in meaningfully.
- **Ongoing Observation and Support:** Practitioners regularly observe children’s learning, respond to their needs, and provide gentle guidance to help them progress.
- **Working in Partnership with Families:** Staff share information with parents and carers, listen to their insights, and involve them in planning the best support for their child.
- **Staff Development:** Practitioners take part in continued professional learning to strengthen their understanding of inclusive early years practice.
- **Adaptable Spaces:** Nursery rooms are arranged in ways that allow children to move freely, explore safely, and access calming or quiet areas when needed.

Allens Croft Nursery School makes every effort to promote inclusivity and ensures that all children have access to a broad and engaging curriculum. The nursery recognises that some children may require ‘reasonable adjustments’ to participate fully, and these are thoughtfully implemented to support every child’s involvement in all areas of nursery life.

Identifying special educational needs is a key part of the nursery’s approach to monitoring each child’s progress and development. Staff understand the importance of recognising difficulties early and do so through ongoing observations and assessments during everyday learning and play.

Children with significant health needs are supported through individual Healthcare Plans, developed collaboratively with parents, carers and relevant medical professionals. Staff receive appropriate training to ensure that children with particular needs are safely and confidently supported.

The nursery operates in line with its inclusive philosophy and statutory duties, and there are no known barriers preventing any child from accessing classrooms, activities or the wider curriculum. Provision is reviewed at least annually in response to the needs of the cohort, and additional assessments are carried out for new children joining throughout the year to ensure support is in place from the outset.

Access to information

Allens Croft Nursery School strives to improve the delivery of written information to pupils, staff, parents and visitors with disabilities, including handouts, timetables, textbooks and information about the school and school events. The information is made available in various preferred formats within a reasonable time frame.

Website: Web accessibility is the inclusive practice of ensuring there are no barriers that prevent interaction with, or access to, websites by people with all types of disabilities. When sites are correctly designed, developed and edited, more users have equal access to information and functionality. Within the context of ‘reasonable’ under the Equality Act, the school’s website is acceptable.

The website contains all of the information available to parents and students that is required. There is a link to Google Maps for users to plan their route and the website is easy to navigate.

Signage: School signage, internal and external, should be large enough (large font) and at a height which can be read easily by any user of the building including those in wheelchairs. School signs make clear where access points and exits points are including disabled signs and disabled toilets.

Technology and furniture: Technology enables all students to access information readily regardless of their disability and is adjusted, where appropriate for students, known to the school already, who suffer hearing loss.

Where appropriate, disabled students are equipped with laptop, iPad, reading pen or other new technologies to assist them in accessing information and learning including practical subjects such as technology and PE.

Where appropriate and if required, specialist ergonomic furniture will be purchased to enable those with a disability to learn.

Summary

Commitment to Accessibility

Allens Croft Nursery School is committed to continuous improvement in accessibility. They have implemented a range of strategies and initiatives to enhance the physical environment, curriculum, and communication methods. Their Accessibility Plan outlines their ongoing efforts to ensure that their school is a place where all students feel welcome, supported, and empowered to succeed.

It is for the School's Senior Leadership Team and Management to take ownership of actions to improve accessibility, in the context of the many competing demands schools face. The priorities suggested in the Accessibility Action Plan may be helpful in that regard.

In the UK, maintained schools are required to publish their Accessibility Plan online. This is part of their obligations under the School Information (England) Regulations 2008, as amended by the School Information (England) (Amendment) Regulations 2012 and 2016. The plan should be accessible on the school's website, and if the school doesn't have its own website, it should be published on an alternative website with a link provided to parents and carers. It is suggested that the school's own development and improvement plan (SIP) contains targets linked to this Accessibility Action Plan, to encourage allocation of staffing and budget resource to support further improvements to accessibility.

Equality Act Audits relationship with Allens Croft Nursery School does not end with the submission of this document. We remain available by telephone or email for further discussion, advice and support throughout the currency of this audit. We especially welcome feedback regarding your progress. Please do share your success stories with us.

Thank you for the opportunity to work with the school, and the hospitality extended during our visit to the school. We look forward to having the opportunity to support the school again, should you kindly choose to reappoint us.

Auditor name, post nominal qualifications

25/03/2026

For Equality Act Audits.

1.1 Table of Audit Findings

This table summarises the audit outcomes. The detailed findings are given in Section 10 below.

Action Plan recommendations, where appropriate, are provided in Section 13.

Reference	Audit Aspect	Outcome 2026
Access to Information		
10.1.1	Internal communication strategies	Compliant
10.1.2	Arrangements for providing information in simple language, large print, via digital audio, by Braille	Compliant
10.1.3	School website and social media content	Improvement Recommended
10.1.4	Actively promoting and communicating an inclusive environment in your school	Compliant
10.1.5	Staff familiarity with technologies and support strategies and processes developed to assist people with disabilities	Compliant
10.1.6	Complaints process	Compliant
Access to Site and Facilities		
10.2.1	Access via Public Transport	Compliant
10.2.2	Arrangements for accessible parking	Exemplary
10.2.3	Security gates and barriers	Compliant
10.2.4	Access through the site to Reception	Compliant
10.2.5	Reception facilities	Improvement Recommended
10.2.6	External areas, movement between buildings	Compliant
10.2.7	Emergency Evacuation and Lockdown Procedures	Compliant
10.2.8	Internal movement – corridors and evacuation routes	Compliant
10.2.9	Internal movement – stairs and lifts	Compliant
10.2.10	Accessible Toilets	Improvement Recommended
10.2.11	Changing Rooms	N/A
10.2.12	Medical Facilities	Compliant
10.2.13	School Signage (Internal and External)	Improvement Recommended

10.2.14	Internal décor, finishes and Lighting	Compliant
10.2.15	Intervention Rooms, Sensory Rooms and Quiet Corners	Compliant
10.2.16	Dining and Catering	Compliant
10.2.17	Social Spaces & Playgrounds	Compliant
10.2.18	Doors	Compliant
10.2.19	Teaching and study spaces, Furniture & teaching Equipment	Compliant
10.2.20	Staff facilities	Improvement Recommended
Access to Education		
10.3.1	Staff Expertise and Training, including Disability Awareness Training	Compliant
10.3.2	Admission	Compliant
10.3.3	SEN Information Report	Compliant
10.3.4	Safeguarding	Compliant
10.3.5	Pupils with physical Health Care Needs	Compliant
10.3.6	Access to the Curriculum and Lesson Planning for pupils with SEND	Compliant
10.3.7	Access to assignments and examinations for pupils with SEND	Compliant
10.3.8	Access to Educational Visits and Extra Curricular Activities	Compliant
10.3.9	Pupil Outcomes	Compliant
10.3.10	Staffing & Leadership	Compliant

Introduction to Accessibility and Equality Legislation in Schools

Whilst this audit and report focuses primarily upon accessibility for disabled persons, schools still need to comply with the whole of the Equality Act 2010. To that end this section introduces the wider Act so that the disability access issues raised can be considered within the context of the overall Act.

The following has largely been extracted and paraphrased from *The Equality Act 2010 and Schools – Departmental Advice for school leaders, school staff, governing bodies and local authorities*, Department for Education (May 2014) as permitted under Open Government Licence V2.0.

1.2. Overview of The Equality Act 2010

1.2.1 The Equality Act 2010 replaced nine major Acts of Parliament and almost a hundred sets of regulations which had been introduced over several decades. It provides a single, consolidated source of discrimination law, covering all the types of discrimination that are unlawful. It simplifies the law by getting rid of anomalies and inconsistencies that had developed over time, and it extends protection against discrimination in certain areas.

1.2.2 As far as schools are concerned there are some changes, but for the most part the effect of the law is the same as it has been in the past – schools which are already complying with the law will not find major differences in what they need to do. In some areas – in particular the introduction of the public sector equality duty which has replaced the three separate duties on race, disability and gender – the overall effect of the Act is to reduce a certain amount of bureaucracy and so should be less burdensome and more effective.

1.3. Schools: who and what the Act applies to

1.3.1 In England and Wales the Act applies to all maintained and independent schools, including Academies, and maintained and non-maintained special schools. In Scotland it applies to schools managed by education authorities, independent schools and schools receiving grants under section 73(c) or (d) of the Education (Scotland) Act 1980.

1.3.2 The Act makes it unlawful for the responsible body of a school to discriminate against, harass or victimise a pupil or potential pupil:

- in relation to admissions,
- in the way it provides education for pupils,
- in the way it provides pupils access to any benefit, facility or service, or
- by excluding a pupil or subjecting them to any other detriment.

1.3.3 The “responsible body” is the governing body or the local authority for maintained schools in England and Wales, the education authority in the case of maintained schools in Scotland, and the proprietor in the case of independent schools, Academies or non-maintained special schools. In practice, any persons acting on behalf of the responsible body – including employees of the school – are liable for their own discriminatory actions, and the responsible body is also liable unless it can show that it has taken all reasonable steps to stop the individual from doing the discriminatory action or from doing anything of that kind.

1.3.4 The Act deals with the way in which schools treat their pupils and prospective pupils: the relationship between one pupil and another is not within its scope. It does not therefore bear directly on such issues as bullying by pupils. However, if a school treats bullying which relates to a protected

ground less seriously than other forms of bullying – for example failing to protect a disabled pupil against bullying by classmates – then it may be guilty of unlawful discrimination.

1.3.5 The school's liability not to discriminate, harass or victimise does not end when a pupil has left the school, but will apply to subsequent actions connected to the previous relationship between school and pupil, such as the provision of references on former pupils or access to "old pupils" communications and activities.

1.4. Protected characteristics

1.4.1 The term "protected characteristics" is used as a convenient way to refer to the personal characteristics to which the law applies.

1.4.2 It is unlawful for a school to discriminate against a pupil or prospective pupil by treating them less favourably because of their:

- sex
- race
- disability
- religion or belief
- sexual orientation
- gender reassignment
- pregnancy or maternity

1.4.3 This audit and report specifically focusses upon disability access. <Equality Act Audits can undertake separate audits of compliance in the remaining areas – please contact us for further details and a quotation.

2. Special provisions for disability

The following has been extracted and paraphrased from *The Equality Act 2010 and Schools – Departmental Advice for school leaders, school staff, governing bodies and local authorities*, Department for Education (May 2014) as permitted under Open Government Licence V2.0.

2.1.1 The law on disability discrimination is different from the rest of the Act in several ways. It works in only one direction – that is to say, it protects disabled people but not people who are not disabled. This means that schools are allowed to treat disabled pupils more favourably than non-disabled pupils, and in some cases are required to do so, by making reasonable adjustments to put them on a more level footing with pupils without disabilities.

2.1.2 The definition of what constitutes discrimination is more complex. Provision for disabled pupils is closely connected with the regime for children with special educational needs

2.1.3 The overriding principle of equality legislation is generally one of equal treatment - i.e., that you must treat a black person no less well than a white person, or a man as favourably as a woman. However, the provisions relating to disability discrimination are different in that you may, and often must, treat a disabled person more favourably than a person who is not disabled and may have to make changes to your practices to ensure, as far as is reasonably possible, that a disabled person can benefit from what you offer to the same extent that a person without that disability can. So, in a school setting the general principle is that you must treat male and female, black and white, gay and straight pupils equally - but you may be required to treat disabled pupils differently. Discrimination is also defined rather differently in relation to disability

2.1. Provisions relating to disability

The disability provisions in the Equality Act mainly replicate those in the former Disability Discrimination Act (DDA). There are some minor differences as follows:

- Unlike the DDA the Equality Act does not list the types of day-to-day activities which a disabled person must demonstrate that they cannot carry out, thus making the definition of disability less restrictive for disabled people to meet.
- Failure to make a reasonable adjustment can no longer be defended as justified. The fact that it must be reasonable provides the necessary test.
- Direct discrimination against a disabled person can no longer be defended as justified – bringing it into line with the definition of direct discrimination generally.
- From September 2012 schools and local authorities have a duty to supply auxiliary aids and services as reasonable adjustments where these are not being supplied through Special Educational Needs (SEN) EHCPs or from other sources. In practice this will already be being done in many cases.

2.2. Definition of disability

2.2.1 The Act defines disability as when a person has a ‘physical or mental impairment which has a substantial and long-term adverse effect on that person’s ability to carry out normal day to day activities.’ Some specified medical conditions, HIV, multiple sclerosis and cancer are all considered as disabilities, regardless of their effect.

2.2.2 The Act sets out details of matters that may be relevant when determining whether a person meets the definition of disability. Long term is defined as lasting, or likely to last, for at least 12 months.

2.3. Unlawful behaviour regarding disabled pupils

2.3.1 Direct discrimination

A school must not treat a disabled pupil less favourably simply because that pupil is disabled – for example by having an admission bar on disabled applicants.

A change for schools in this Act is that there can no longer be justification for direct discrimination in any circumstances. Under the DDA schools could justify some direct discrimination – if it was a proportionate means of meeting a legitimate aim. What the change means is that if a school discriminates against a person purely because of his or her disability (even if they are trying to achieve a legitimate aim) then it would be unlawful discrimination as there can be no justification for their actions.

2.3.2 Indirect discrimination

A school must not do something which applies to all pupils, but which is more likely to have an adverse effect on disabled pupils only – for example having a rule that all pupils must demonstrate physical fitness levels before being admitted to the school – unless they can show that it is done for a legitimate reason and is a proportionate way of achieving that legitimate aim.

2.3.3 Discrimination arising from disability

A school must not discriminate against a disabled pupil because of something that is a consequence of their disability – for example by not allowing a disabled pupil on crutches outside at break time because it would take too long for her to get out and back. Like indirect discrimination, discrimination arising from disability can potentially be justified.

2.3.4 Harassment

A school must not harass a pupil because of his disability – for example, a teacher shouting at the pupil because the disability means that he is constantly struggling with class-work or unable to concentrate.

2.4. Public Sector Equality Duty

The Public Sector Equality Duty requires all public authorities, including schools, to have due regard to the need to:

- Eliminate discrimination and other conduct prohibited by the Act;
- Advance equality of opportunity
- Foster good relations

2.5 Disability Equality Duty

Schools previously had a statutory duty which required them to take proactive steps to tackle disability discrimination and promote equality of opportunity for disabled pupils. Under the Equality Act, this has been replaced by the **general equality duty** not to discriminate, and the **specific duties** below.

2.5.1 Reasonable adjustments and when they must be made

The duty to make reasonable adjustments applies only to disabled people. For schools the duty is summarised as follows:

- Where something a school does places a disabled pupil at a disadvantage compared to other pupils then the school must take reasonable steps to try and avoid that disadvantage.
- Schools will be expected to provide an auxiliary aid or service for a disabled pupil when it would be reasonable to do so and if such an aid would alleviate any substantial disadvantage that the pupil faces in comparison to non-disabled pupils. Schools are not subject to the requirement of reasonable adjustment duty concerned with making alterations to physical features because this is already considered as part of their planning duties.

2.5.2 Auxiliary aids and services

The duty to provide auxiliary aids as part of the reasonable adjustment duty is a change for all schools from September 2012 and also extends to maintaining local authorities.

2.5.2.1 Many disabled children will have a SEN and may need auxiliary aids which are necessary as part of their SEN provision; in some circumstances as part of a formal SEN EHCP. These aids may be provided in the school under the SEN route, in which case there will be no need for the school to provide those aids as part of their reasonable adjustment duty.

2.5.2.2 Schools will have to consider whether to provide auxiliary aids as a reasonable adjustment for disabled children. This will particularly be the case where a disabled child does not have a SEN EHCP or where the EHCP does not provide the auxiliary aid or service.

2.5.2.3 There should be no assumption, however, that if an auxiliary aid is not provided under the SEN regime, then it must be provided as a reasonable adjustment. Similarly, whilst schools and LAs are under the same reasonable adjustment duty, there should be no assumption that where it is unreasonable for a school to provide an auxiliary aid or service, for example on cost grounds, it would then be reasonable for the local authority to provide it. All decisions would depend on the facts of each individual case. The nature of the aid or service, and perhaps also the existence of local arrangements between schools and local authorities, will help to determine what would be reasonable for the school or the LA to provide. For example, where there is a centrally organised visual or hearing impairment service it may be

reasonable for the local authority to provide more expensive aids or support through that service but not reasonable for an individual school to have to provide them.

2.5.2.4 The term “auxiliary aids” found in the Equality Act 2010 covers both auxiliary aids and services but there is no legal definition for what constitutes auxiliary aids and services. Considering the everyday meaning of the words, is, however, helpful. Legal cases have referred to the Oxford English Dictionary definition of auxiliary as “helpful, assistant, affording aid, rendering assistance, giving support or succour” and that auxiliary aids and services “are things or persons which help.” Examples of what may be considered an auxiliary aid could be; hearing loops; adaptive keyboards and special software. However, the key test is reasonableness and what may be reasonable for one school to provide may not be reasonable for another given the circumstances of each case.

2.5.2.5 Some disabled children will have a need for auxiliary aids which are not directly related to their educational needs or their participation in school life, for example, things which are generally necessary for all aspects of their life, such as hearing aids. It is likely to be held that it would be unreasonable for a school to be expected to provide these auxiliary aids.

2.5.3 Making reasonable adjustments

2.5.3.1 A minor change for schools is that a failure to make a reasonable adjustment cannot now be justified, whereas under the previous disability discrimination legislation it could be. However, this change should not have any practical effect due to the application of the reasonableness test – i.e., if an adjustment is reasonable then it should be made and there can be no justification for why it is not made. Schools will not be expected to make adjustments that are not reasonable.

2.5.3.2 In addition to having a duty to consider reasonable adjustments for individual disabled pupils, schools will also have to consider potential adjustments which may be needed for disabled pupils generally as it is likely that any school will have a disabled pupil at some point. However, schools are not obliged to anticipate and adjust for every imaginable disability and need only consider general reasonable adjustments - e.g., being prepared to produce large font papers for pupils with a visual impairment even though there are no such pupils currently admitted to the school. Such a strategic and wider view of the school’s approach to planning for disabled pupils will also link closely with its planning duties.

2.5.3.3 The Act does not set out what would be a reasonable adjustment or a list of factors to consider in determining what is reasonable. It will be for schools to consider the reasonableness of adjustments based on the circumstances of each case. However, factors a school may consider when assessing the reasonableness of an adjustment may include the financial or other resources required for the adjustment, its effectiveness, its effect on other pupils, health and safety requirements, and whether aids have been made available through the Special Educational Needs route.

2.5.3.4 Cost will inevitably play a major part in determining what is reasonable and it is more likely to be reasonable for a school with substantial financial resources to have to make an adjustment with a significant cost, than for a school with fewer resources. For example, a small rural primary school may not be able to provide specialised IT equipment for any disabled pupils who may need it and it may not be reasonable for the school to provide that equipment. On the other hand, a much larger school might reasonably be expected to provide it.

2.5.3.5 Often, though, effective and practicable adjustments for disabled pupils will involve little or no cost or disruption and are therefore very likely to be reasonable for a school to have to make.

2.5.3.6 Schools generally will try to ensure that disabled pupils can play as full a part as possible in school life and the reasonable adjustments duty will help support that. However, there will be times when adjustments cannot be made because to do so would have a detrimental effect on other pupils and

would therefore not be reasonable – for example, if a school put on a geology field trip which necessarily involved climbing and walking over rough ground and after fully considering alternatives to accommodate a disabled pupil in a wheelchair who could not take part it determined that there was no viable alternative or way of enabling the disabled pupil to participate or be involved, it would not have to cancel the trip as originally planned. This is unlikely to constitute direct discrimination or failure to make a reasonable adjustment

2.5.3.7 The reasonable adjustments duties on schools are intended to complement the accessibility planning duties and the existing SEN EHCP provisions which are part of education legislation, under which local authorities must provide auxiliary aids to pupils with a EHCP of special educational need.

2.5.4 Schools' duties around accessibility for disabled pupils

2.5.4.1 Schools and LAs need to carry out **accessibility planning** for disabled pupils. These are the same duties as previously existed under the DDA and have been replicated in the Equality Act 2010.

2.5.4.2 Schools must create and provide adequate resources to implement **accessibility plans** which are aimed at:

- increasing the extent to which disabled pupils can participate in the curriculum;
- improving the physical environment of schools to enable disabled pupils to take better advantage of education, benefits, facilities and services provided; and
- improving the availability of accessible information to disabled pupils.

2.5.4.3 School accessibility plans shall be reviewed at least every 3 years.

2.5.4.4 An accessibility plan may be a freestanding document but may also be published as part of another document such as the school development plan.

2.5.4.5 OFSTED inspections may include a school's accessibility plan as part of their review.

2.5.5 Local authorities' duties around accessibility for disabled pupils

LAs must, for the schools for which they are responsible, prepare accessibility strategies based on the same principle as the access plans for schools.

3. Purpose of Audit

- 3.1. The audit addresses and recognises the requirements of the Equality Act 2010. The report includes recommendations for required remedial actions and ongoing monitoring and control measures. Guidance is also referred to such as BS8300: 2009 - Design of Buildings and Their Approach to Meet the Needs of Disabled People - Code of Practice; along with other applicable sources where appropriate.
- 3.2. The focus of this report is to ensure that the school meets with the requirements of part IV of the Equality Act and so does not discriminate against disabled pupils.
- 3.3. However, the report will also deal with the obligations under section III of the Equality Act 2010 which relates to the provision of services to members of the public.
- 3.4. To achieve this, the report will identify where communication strategies, the property, and educational teaching and support processes do not meet current legislation or best practice standards. The report will recommend ways to overcome these issues. Recommendations may incorporate physical adaptations to the site, changes to policies and procedures or a combination of these.

4. Commissioning of Audit

- 4.1. An Accessibility Plan and Audit of Allens Croft Nursery School was commissioned by David Aldworth, Executive Head Teacher & Cluster Lead (South) for the Birmingham Early Years Network (BEYN).
- 4.2. This is the second Accessibility Audit report undertaken at this school by Equality Act Audits Limited.
- 4.3. Initial information was gathered by an initial fact-finding questionnaire and review of information published on the school website.
- 4.4. An on-site audit was undertaken on 25/03/2026 using a checklist.
- 4.5. On the day, the auditor met with Sarah Roberts, SENCO.
- 4.6. The resulting information was compiled into this Audit Report and Action Plan.

5. Credentials of Equality Act Audits Team

Equality Act Audits has been dedicated to assisting schools with their most pressing accessibility issues for over 15 years. As a small team, we understand the importance of equality in education, and each auditor in our team has a personal connection to this cause. We understand that an Accessibility Plan is not just about fulfilling a requirement set by the Department for Education but also creating an inclusive environment for all.

Our aim at Equality Act Audits Limited is to support schools in navigating the complex landscape of the Equality Act. We help schools determine what would be considered a 'reasonable adjustment' and provide recommendations, accordingly, enabling them to ensure equal access and opportunities for all their students, staff and other stakeholders.

Our Access Auditors are not only trained in accessibility but also frequently undertake additional training in equality and diversity. This ensures that our team remains up to date with the latest advancements and best practices in this field.

We are passionate about making a positive impact on education and are committed to assisting schools in creating an inclusive environment where every student can thrive. With our expertise and dedication, we are well-equipped to address the unique challenges faced by schools in the realm of accessibility and equality.

At Equality Act Audits Limited, we are here to provide the guidance and support schools need to create positive change, promote equality, and foster an inclusive educational experience.

All auditors employed by Equality Act Audits hold an Enhanced DBS clearance.

6. Contextual Background to the School

Each individual school differs in context from other schools. This individual context will have a bearing on how and to what extent the school is able to respond to the challenges of maximising accessibility.

The Equality Act 2010 itself doesn't specifically state what should be considered '*reasonable*'. This may seem confusing, but it actually stems from a desire to make the legislation flexible. What might be considered reasonable in one circumstance may well not be reasonable in another.

In order to make appropriate recommendations, context is vital. This enables Equality Act Audits Limited to determine what measures would or wouldn't be '*reasonable*' in a given situation.

While it is essential to have an Accessibility Plan, schools are not strictly bound to implement every recommendation detailed in the plan. However, they should strive to follow best practices to create an inclusive and supportive learning environment for all pupils.

Adhering to the recommendations in the Accessibility Plan is considered best practice. It demonstrates the school's commitment to inclusivity and its proactive approach to addressing potential barriers faced by disabled pupils. Following these recommendations can also enhance the overall educational experience and outcomes for all students.

7.1 Location. Allens Croft Nursery School is situated on Allens Croft Road in Kings Heath, Birmingham (B14 6RP). It sits within the wider South Birmingham area and is easily accessible to families in the local community. The school's official listings consistently place it in the Kings Heath neighbourhood, within the Birmingham local authority area.

Although maintained nursery schools do not typically operate with strict catchment boundaries in the same way primary and secondary schools do, Allens Croft is known to draw families from across several surrounding communities. The nursery welcomes children from Kings Heath, Moseley, Kings Norton, Druids Heath, and other nearby South Birmingham areas, reflecting its inclusive ethos and strong local reputation.

7.2 Ethos of the School. Allens Croft Nursery School builds its ethos around a creative, holistic, and deeply child-centred approach. The school strives to nurture independence, confidence and self-motivation in every child, ensuring that children learn through making choices, exploring freely, and developing self-discipline within a supportive environment. Their practice is guided by principles of participation, negotiation and collaboration, helping children learn how to work with others, show respect, and develop strong social skills.

The nursery places great importance on creating a community where children and families feel genuinely welcomed, valued and supported. Staff work closely with families to provide care that wraps around the needs of each child, offering an inclusive, safe and nurturing environment. Purpose-built spaces and extensive outdoor areas allow children to play, investigate and enjoy meaningful learning experiences that reflect their interests and developmental stages.

At the heart of their ethos is a belief in providing high-quality early education, delivered by experienced early years professionals and qualified teachers. Their curriculum is designed to help every child develop their personality, talents and abilities to the fullest, reflecting children's rights to an education that promotes curiosity, kindness and a sense of belonging.

7.3 Nature of School Site. The nursery is located within a purpose-built centre that also accommodates South Birmingham Primary Care Trust, Allens Croft Children's Centre, and Allens Croft Primary School. Together, these services form a wider education and care hub for children aged 0–11. Although the buildings are connected, the internal doors remain locked to maintain safeguarding at all times. Staff and parents may access certain shared rooms within the Children's Centre when needed.

Completed in 2008, the building is modern, functional, and thoughtfully designed for accessibility. While the overall centre has two floors, the nursery itself is fully based on the ground floor. Facilities such as family rooms are located upstairs, though meetings are arranged downstairs wherever possible. When

first-floor access is required, a lift is available, supported by evacuation chairs positioned at both staircases. Four fully compliant accessible toilets are located throughout the building.

The purpose-built nursery, constructed around 2007, is shared with the NHS and sits directly beside the primary school. It has its own reception area and two large nursery spaces known as Little Nursery and Big Nursery, each offering a range of areas dedicated to different activities. In addition, there are three Discovery Areas designed for their resource-based children, providing tailored support for those with special educational needs.

7.4 Number of pupils. There are 129 total pupils at the school, 26 (20%) represent those with SEND.

7.5 Trend in pupil numbers. School numbers are stable.

7.6 More Able. At Allens Croft Nursery School, they believe in treating all pupils as individuals and so catering for their individual needs. All pupils including the most able are entitled to a challenging and stimulating curriculum that develops their full potential. Within the school's general policy of inclusion, provision for able, gifted and talented pupils is a matter of equal opportunity and they ensure that the most able have the opportunity to nurture their ability, stimulate their desire for life-long learning and to achieve and excel.

7.7 Pupil Premium. There are 56 Pupil Premium Pupils. This represents 43% of the pupil population.

The Pupil Premium is an extra grant of money given to schools by central government to support pupils who qualify for Free School Meals (FSM). The definition includes and pupil that has qualified for FSM in the last 6 years, even if they are not currently claiming. Research shows that on average, pupils qualifying for FSM are likely to do less well at school. Whilst this is an average and a generalisation, the initiative behind the grant is to use the pupil premium to support FSM pupils in any relevant or special ways to enable them to attain and achieve as well as their non-FSM peers.

7.8 Pupils for whom English is not the first language. English as an additional language (EAL) refers to learners whose first language is not English. They may be capable of speaking English and, indeed writing in English, but, as English was not their first language, it is an additional language. A pupil's first language is defined as any language other than English that a child was exposed to during early development and continues to be exposed to in the home or community. If a child was exposed to more than one language (which may include English) during early development, a language other than English should be recorded, irrespective of the child's proficiency in English.

There are 25 EAL pupils. Where appropriate, EAL pupils will be supported by the Special Educational Needs Co-ordinator (SENCO/Head of Learning Support) and teaching staff in the classroom to enable the pupil to complete tasks with understanding.

7.9 SEN Staffing. In a nursery setting, key staff such as Room Leaders and Early Years Practitioners are responsible for monitoring each child's development and identifying any emerging needs. This includes planning and delivering additional support where required—either through targeted small-group activities, adapted play-based provision, or individualised strategies—and communicating any concerns to the Special Educational Needs and Disabilities Co-ordinator (SENCO). Practitioners contribute to Individual Learning Support Plans or individual target plans, sharing and reviewing them with parents at least once each term so that progress can be discussed and next steps agreed. They ensure that teaching and learning opportunities are personalised and reflect the arrangements set out on the nursery's provision map. Staff must also follow the nursery's SEN policy consistently within their rooms and for all children requiring additional support.

The SENCO plays a central role in coordinating SEND provision within the nursery. This includes offering professional guidance to colleagues, working closely with families, and liaising with external agencies where specialist input is needed. The SENCO oversees the day-to-day implementation of the nursery's SEN policy and ensures that the setting's SEN Information Report is updated annually and published on the nursery website, as required. They coordinate support for children with SEND, advise on the graduated approach used in early years, and help determine how resources—both staffing and funding—should be allocated to meet children's needs effectively. The SENCO works with parents, other early years providers, schools, Educational Psychologists, health and social care professionals, and the Local Authority as required. They also manage transitions, ensuring that children move smoothly between support levels within the nursery, progress confidently from one age group to the next, and are well supported when transferring to a new school.

7.10 Safeguarding. As well as statutory responsibilities in relation to children's learning, the school has a pastoral and legal responsibility towards their pupils and must recognise that the children and young people in their charge have a fundamental right to be protected from harm.

Allens Croft Nursery School is committed to safeguarding and promoting the welfare and well-being of children, young people and staff. They believe that everyone, without exception, has a right to be safe and to be treated with dignity and respect regardless of background and free from discrimination. The school recognises that children learn best when they are healthy, safe and secure. Any allegation of child abuse or a safeguarding issue will be treated with the utmost concern. They will always liaise with relevant external agencies in accordance with locally agreed protocols.

The arrangements for safeguarding are effective. There is a clear ethos across the school that sets the safety of pupils as a high priority. Leaders have been effective in creating a culture in which safeguarding is seen as everyone's responsibility and not just the designated safeguarding leader. Effective record-keeping reflects the school's commitment to keep all pupils safe. Parents and carers say their children are well cared for and safe at school.

Training for staff and governors in child protection means that they are knowledgeable and up to date with the most recent guidance and legislation. Staff are vigilant and know what to do should they have any concerns about a child's welfare. The school works very well with parents and a wide range of external agencies to keep children safe and free from harm. Leaders are tenacious in making sure that safeguarding matters are followed up thoroughly. Governors make sure that all checks on staff and volunteers working with children are made and recorded.

7.11 Neurodivergent environment. Allens Croft Nursery School recognises the importance in respecting the diversity of neurological differences amongst all individuals. This concept is rooted in the idea of neurodiversity, which suggests that neurological differences like Autism Spectrum Disorder (ASD), Attention Deficit Hyperactivity Disorder (ADHD), dyslexia, and others are natural variations of the human brain. The school works hard to create environments with inclusive spaces where neurodivergent individuals can thrive.

There are numerous references in this Plan on how to create a neurodivergent environment and below is a summary. Creating a neurodivergent-friendly environment involves implementing practices and adjustments that support individuals with diverse neurological needs. Here are some key strategies to achieve this:

Physical Environment

1. **Sensory-Friendly Spaces:** Designate quiet areas where individuals can retreat if they feel overwhelmed by sensory stimuli.
2. **Adjustable Lighting:** Use dimmable lights or natural light options to accommodate those who are sensitive to bright or fluorescent lights.
3. **Comfortable Seating:** Provide a variety of seating options to cater to different sensory and physical needs.
4. **Clear Signage:** Use clear, simple signs and visual aids to help individuals navigate the environment easily.

Educational and Workplace Practices

1. **Flexible Schedules:** Offer flexible working or learning hours to accommodate different productivity and focus patterns.
2. **Assistive Technology:** Provide tools and technology that support different learning and working styles, such as speech-to-text software or noise-cancelling headphones.
3. **Individualised Support Plans:** Develop personalised plans that outline the specific needs and accommodations for each neurodivergent individual.
4. **Inclusive Curriculum:** Ensure that educational materials and activities are accessible and engaging for all students, regardless of their neurological differences.

Communication and Interaction

1. **Clear Communication:** Use straightforward, unambiguous language and provide written instructions or summaries to reinforce verbal communication.
2. **Social Skills Training:** Offer programs or workshops to help neurodivergent individuals develop social skills and navigate social interactions.
3. **Awareness and Training:** Educate staff and peers about neurodiversity and how to support neurodivergent individuals effectively.

Policies and Culture

1. **Inclusive Policies:** Implement policies that promote inclusivity, prevent discrimination, and provide reasonable accommodations for neurodivergent individuals.
2. **Foster a Supportive Culture:** Encourage an environment where neurodivergent individuals feel valued and understood. Promote acceptance and celebrate neurodiversity.
3. **Regular Feedback:** Gather feedback from neurodivergent individuals to continuously improve the environment and address their needs.

Continuous Improvement

1. **Ongoing Training:** Provide regular training for staff and peers on neurodiversity and best practices for creating inclusive environments.
2. **Monitor and Evaluate:** Regularly assess the effectiveness of your strategies and make necessary adjustments based on feedback and new research.

Allens Croft Nursery School has implemented many of these strategies and has been successful in creating a neurodivergent-friendly environment that supports and celebrates the unique strengths and contributions of all its individuals.

8. Constraints and limitations to the audit

8.1 This report may not be copied or reproduced by any means without prior written permission from Equality Act Audits. It is a confidential report and has been prepared for the exclusive use of the commissioning party and unless otherwise agreed in writing by Equality Act Audits, no other party may use, make use of or rely on the contents of this report. No liability is accepted by Equality Act Audits for any use of this report, other than for the purposes for which it was originally prepared and provided.

8.2 Opinions and information provided in the report are based on Equality Act Audits using due skill, care and diligence in the preparation of the same and no warranty is provided as to their accuracy. It should be noted, and it is expressly stated, that no independent verification of any of the documents or information supplied to Equality Act Audits has been made.

8.3 The content of this report is based on the information and access provided to the consultant at the time of this audit. Any recommendations or advice in this report is based upon evidence seen. Whilst every care is taken to interpret current Acts, Regulations and Approved Codes of Practices, these can only be authoritatively interpreted by Courts of Law. Undergoing of the recommendations in the report could assist in meeting the requirements of the Equality Act 2010 / Disability Discrimination Act but does not guarantee it. Nor does compliance with this report remove any liability on the part of the client or give protection against legal proceedings.

8.4 OFSTED and others should not infer weakness in the management of a school from the outcomes of the accessibility audit. The ability of the school to address issues considered to require improvement or be inadequate may be constrained by a variety of factors outside the control and influence of the school management and leadership team.

8.5 The “myth” of compliance: There is actually no such concept as being “fully DDA compliant” for an existing building. The phrase has entered the language, but the legislation reads differently. A new public building will have to show disabled access, accessible toilets etc. but an existing structure will be asked to make “reasonable adjustments”.

8.6 Disability and equality legislation is not prescriptive in its recommendations to improve accessibility. As such, compliance with the various Acts cannot ultimately be determined or used as a method for assessing accessibility. Only tangible standards set out in guidance documents such as BS8300: 2009 can be referred to for 'compliance'.

8.7 Although we have included the code of practice for means of escape for disabled people within our criteria, this report should not be considered as a detailed assessment of the overall means of escape provision, which should be included in the school’s emergency evacuation plan.

8.8 In the time available it is not possible to visit every occupied room. In the case of large school premises, a reasonable sample of teaching environments for pupils and working environments for staff and visitors has been visited. Plant rooms and workshops etc not used for educational purposes, and rooms otherwise not visited during the audit process are not covered by this report.

8.9 Recommendations represent best practice at the time of writing, but the concepts of “best practice” and “reasonable” will change with time. Research and innovation allow new concepts and products/services to become available. Therefore, the Equality Act recommends a school be audited every 3 years.

8.10 Fire Evacuation and Health & Safety legislation may conflict with disability equality legislation. When this happens fire and safety legislation take priority (although H&S and disability equality often share common objectives).

8.11 For this report, consultation with local Access Groups has not been undertaken. It is advisable to seek advice from various user groups and appropriate employees prior to undertaking specific adaptation works arising from recommendations within this report.

8.12 If the site or buildings have a listed building status or are located within a designated conservation area, professional advice must be sought for planning applications.

8.13 Where recommendations have been suggested that may influence the evacuation strategy or the fire safety integrity of the building additional consultation with the relevant local Fire Officer is advised prior to works being undertaken.

8.14 Externally sourced images are used within this report; these are for illustrative purposes only. External images are indicated along with their source.

9. Key to the Accessibility Audit

9.1 Key

Reference No.	The reference number of the audit item. This links through to the Action Plan.
Best Practice	A brief summary of accepted best practice in the area being considered, including where appropriate a perspective from the point of view of disabled persons.
Audit findings	Captures what was observed or stated to be the case during the audit process. Where appropriate a photo will provide visual support to the evidence.
Grade 2026	The Audit aims to take a non-judgemental stance. However, it is perhaps inevitable that grading findings may feel judgemental. Feedback indicates that many schools find ranking the findings to be helpful. Understand that the grades are intended to help focus attention where it is most required, for the benefit of those affected, and are not intended as a judgement on the quality of leadership or management.
Suggestions to improve/resolve	Constructive suggestions as to how further actions will help improve accessibility. Significant actions will be referred to in the Action Plan.

9.2 Findings descriptors

For each of the three sections of the audit, an overall grade is indicated. These three grades together inform the overall audit grade indicated in the Executive Summary.

	In an audit item
Exemplary	Highly effective, exemplary or innovative practice that fully supports accessibility for all pupils or visitors.
Compliant	Effective practice that supports accessibility for a significant majority of pupils or visitors
Requires Improvement	Practice supports accessibility for most pupils; however, a significant minority of pupils or visitors could be more effectively supported.

	<p>In some cases, there may be potential health and safety risks or where failure to implement changes would be highly likely to attract legal implications. Immediate action is recommended to put changes into effect – see Action Plan.</p>
--	--

Accessibility Audit

10.1. Access to Information

An accessible school is one where pupils and parents can access information normally provided by the school to its pupils available to disabled pupils, by means appropriate to the relevant disability; and where staff are well trained, aware, and able to initiate and implement changes to facilitate such access. Information might include items such as handouts, timetables, textbooks or information about school events, reports, newsletters, and general letters home.

Schools have a duty to parents with disabilities to let them have reasonable access to services related to the education of their child or children. This is to make sure parents with disabilities can be fully involved in their child's education. Your child's school should make 'reasonable adjustments' to procedures and policies or provide you with aids to help you access their services, like putting information in accessible formats. They must not refuse to provide a service, or provide a lesser service, to you as a parent with disabilities.

Alternative formats for the provision of information might include: large print, audio tape, Braille, a recognised symbol system, the use of ICT and the provision of information orally, through lip reading or in sign language.

Information must be provided within a reasonable time frame, i.e., to be of proper use for the pupil. For example, a reasonable time frame for the provision of a handout needed during a lesson would be the start of the lesson.

In practice, it is anticipated that most pupils requiring information to be provided in a different format will already have had their needs identified through the school's and/or the Local Authority's SEN identification processes.

10.1.1	Internal communication strategies including those for hearing and sight impaired pupils, staff and visitors.
Best Practice	<p>Inclusive communication is a way of communicating that respects and values the diversity of all staff members, regardless of their background, identity, or perspective. It helps to create a culture of inclusion, where everyone feels welcome, supported, and empowered to contribute fully.</p> <p>There are many benefits of inclusive communication for both individuals and schools. Some of them are:</p> <ul style="list-style-type: none"> • It fosters a sense of belonging and engagement among your teaching staff, which can improve their motivation, performance, and retention. • It enhances innovation and creativity by encouraging diverse perspectives and ideas to be shared and heard. • It improves decision-making and problem-solving by ensuring that everyone's input is considered and valued. • It reduces conflicts and misunderstandings by promoting open dialogue and mutual respect.

	<ul style="list-style-type: none"> • It builds trust and credibility by demonstrating transparency and accountability. <p>Best practices for supporting hearing and sight-impaired pupils in school involve creating an inclusive environment that addresses their specific needs. Here are some key strategies:</p> <p>For Sight-Impaired Pupils:</p> <ul style="list-style-type: none"> • Accessible Materials: Provide materials in accessible formats, such as large print, Braille, or digital texts. • Specialist Support: Employ qualified teachers of the visually impaired (QTVIs) and habituation specialists to provide tailored support. • Inclusive Environment: Make physical adjustments to the classroom, such as clear pathways, tactile markers, and accessible technology. • Assistive Technology: Use technology like screen readers, magnification software, and Braille displays to support learning. • Collaborative Working: Work closely with parents, specialists, and other staff to create individualised support plans. • Social Inclusion: Promote social inclusion by encouraging sight-impaired pupils to participate in extracurricular activities and group work. <p>For Hearing-Impaired Pupils:</p> <ul style="list-style-type: none"> • Use of Assistive Devices: Ensure that hearing aids, cochlear implants, and FM systems are available and properly maintained. • Acoustic Modifications: Improve classroom acoustics by using soft furnishings, carpets, and curtains to reduce background noise. • Seating Arrangements: Seat hearing-impaired pupils closer to the teacher and away from noise sources like air conditioning units or windows. • Visual Aids: Use visual aids, such as written instructions, diagrams, and captions for videos, to support learning. • Teacher Training: Provide training for teachers on how to use assistive devices and implement inclusive teaching practices. • Peer Support: Encourage peer support and buddy systems to help hearing-impaired pupils integrate socially and academically.
Audit Findings	<p>Allens Croft Nursery School is committed to ensuring that all communication is accessible to every member of its community, including those with hearing, visual, or other communication needs. The school shares information through a wide range of methods—paper letters, the school website, social media, text messages, and verbal updates—to make sure parents and carers can access information in the way that suits them best. The website offers language-change functionality, and the school consistently uses accessible fonts and visual supports to enhance clarity and understanding.</p> <p>The school takes active steps to prevent discrimination and promote equality in all aspects of communication. Staff strive to understand the individual needs of each parent and carer and adapt their communication approaches accordingly. This may include offering telephone consultations for parents who are</p>

	<p>neurodivergent or who find face-to-face meetings challenging, ensuring that every family can engage comfortably and effectively.</p> <p>Feedback is a key part of the school’s approach to improving communication. Allens Croft Nursery School regularly seeks the views of parents and carers through questionnaires and requests feedback following specific activities and events, such as transition and induction processes. This ongoing dialogue helps refine communication strategies and ensure they remain inclusive and responsive.</p> <p>All communication materials produced by the school—whether newsletters, emails, website content, or printed information—are created with inclusivity in mind and are carefully checked to ensure they are free from discriminatory language or imagery. The school also maintains a clear policy for handling and communicating about any incidents of bullying or harassment related to protected characteristics, ensuring that responses are transparent, respectful, and aligned with its values.</p> <p>Allens Croft Nursery School openly communicates its commitment to equality, diversity, and inclusion with new children, families, and staff members as they join the school community. Above all, the school strives to ensure that every pupil, regardless of background or individual characteristics, feels heard, valued, and respected in all their interactions with the school.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.1.2	Arrangements for providing information in simple language, large print, via digital audio, by Braille
Best Practice	<p>To reach all their audience, schools need to make effective use of accessible communication formats (also known as alternative formats).</p> <p>Involve disabled people from your school parents/carers in developing and reviewing a strategy for producing information in accessible formats. They will know their needs and could help you find the most effective ways of meeting them. You can also approach disability organisations for advice.</p> <p>Your strategy should outline:</p> <ul style="list-style-type: none"> • how you will anticipate the needs of disabled people • what minimum standards are in place • who is responsible and who will pay for the accessible formats • what type of information you will prioritise • how you will enforce and monitor the strategy • you could potentially include a note on your website or promotional materials, create a sign or post a notice on a bulletin board. <p>Examples of how and when schools can support parents with disabilities include:</p>

	<ul style="list-style-type: none"> • using a pen and notepad to communicate with you if you are deaf or hearing impaired and/or providing induction loops in a certain room. • arranging for an interpreter, for example, in British Sign Language (BSL) and/or allowing more time for one-to-one meetings. • updating you on your child's progress by telephone or email if you are unable to go to a meeting because of your impairment. • holding a meeting in an accessible location, for example, to avoid stairs, if you have impaired mobility. • providing a script of a school play if you are deaf or hearing impaired to help follow the action. • The UK Association for Accessible Formats is an industry association that sets standards and promotes best practice for quality accessible information based on user needs. Their website includes a directory of accessible format producers.
Audit Findings	<p>Allens Croft Nursery School is committed to ensuring that all information it provides is fully accessible to every member of its community. The school is able to offer information in a variety of alternative formats, including simple language, large print, digital audio, and Braille, reflecting its dedication to inclusivity and its recognition that families may require different methods of access. These arrangements form an important part of the school's wider commitment to ensuring that everyone can obtain the information they need with ease.</p> <p>Clear procedures are in place for students, staff, and parents to request information in accessible formats, and the school ensures that any information provided through these alternative methods is delivered as promptly and comprehensively as the standard versions. This emphasis on parity ensures that no individual is disadvantaged by the format through which they receive information.</p> <p>Allens Croft Nursery School actively involves parents, carers, and, where appropriate, students in the development and review of its accessibility policies and practices. Feedback is gathered through questionnaires that invite families to share their views and offer suggestions for improvement. During parent events—such as SEND coffee mornings—the school also works collaboratively with families on the co-production of documents to ensure that communication materials are genuinely accessible and reflect the lived experience of the school community.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing actions and processes.

10.1.3	Is the school Website and Social Media content accessible?
Best Practice	It is essential that the school's website is accessible in order to provide equal access and equal opportunity to people with diverse abilities. On a website, accessibility depends on how a person's disability affects the way they perceive information on a page and how they navigate within and between pages.

	<p>Websites should be accessible to everyone, including users with impairments to their:</p> <ul style="list-style-type: none"> • Vision – severely sight impaired (blind), sight impaired (partially sighted), or colour-blind people • Hearing – people who are deaf or hard of hearing • Mobility – those who find it hard to use a keyboard • Understanding – for example those with dyslexia, autism or learning difficulties <p>Ensuring a school's website is accessible to everyone is essential. Here are some key components it should include:</p> <ol style="list-style-type: none"> 1. Text Alternatives: All non-text content, like images and videos, should have alternative text descriptions (alt text) for screen readers. 2. Keyboard Navigation: The website should be fully navigable using a keyboard, for those who cannot use a mouse. 3. Readable Text: Use clear and simple language. Ensure text contrast ratios meet accessibility standards to make text easy to read. 4. Captions and Transcripts: Provide captions for videos and transcripts for audio content. 5. Consistent Layout: Use a consistent and predictable layout, so users can easily find and understand the information. 6. Scalable Text: Allow users to enlarge text without loss of content or functionality. 7. Accessible Forms: Ensure forms are labelled clearly, with instructions available for users who rely on screen readers. 8. Error Identification: Clearly identify errors in forms and provide guidance on how to correct them. 9. Interactive Elements: Make sure all interactive elements (buttons, links, etc.) are accessible and operable by all users. 10. Accessibility Statement: Include an accessibility statement outlining the measures taken and providing contact information for users who encounter issues. <p>These practices will help create an inclusive, user-friendly experience for all visitors to the school's website.</p> <p>Schools must publish specific information online to comply with regulations. This includes policies on admission arrangements, behaviour, complaints, charging and remissions, curriculum, special educational needs and disabilities (SEND), and more.</p> <p>The school's SEN Information Report must be published on their website. This report provides details about the support and provisions available for students with SEN, ensuring transparency and accessibility for parents, carers, and the wider community.</p> <p>Independent schools are not legally required to publish a Special Educational Needs (SEN) Information Report. However, it is strongly recommended.</p>
Audit Findings	<ul style="list-style-type: none"> • Is the school's SEN Information Report available on the website? Yes • Are all policies relating to equality, access, and medical support processes available on the website? Yes

	<ul style="list-style-type: none"> • Does the website have an Accessibility Statement available? No. An accessibility statement should be displayed on a school’s website because it clearly demonstrates the school’s commitment to inclusion, transparency, and legal compliance. It helps parents, carers, staff, and visitors understand how the website can be used by people with different needs, including those using assistive technologies. It also outlines any accessibility limitations and how users can request support or alternative formats, ensuring that everyone can access important school information independently and confidently. • Does the website have scalable text allowing users to enlarge text without loss of content or functionality? No • Is the website easy to navigate? Yes <p>Website accessibility is an ongoing process and if the school would like to make further improvements, here are some points to consider:</p> <ol style="list-style-type: none"> 1. Some visually impaired users, especially those using keyboard and screen reader users, often navigate by heading elements. An empty heading on your website will present no information to them, causing confusion. 2. Identifying the language of the page. This allows screen readers to understand the content visually impaired users are accessing. 3. Increase the contrast between the foreground text colour and the background colour. Large text, such as those larger than 18 point or 14 point or in bold, does not require as much contrast as smaller text. 4. Image links can be confusing to users accessing websites via screen readers. Include appropriate alternative text on an image within a link to guarantee that the function and purpose of the link, as well as the content of the image itself, is understandable.
Grade 2026	Improvement Recommended
Suggestions to improve/resolve	It is strongly recommended that the school publishes a clear and accessible Accessibility Statement on its website. This will ensure the school meets statutory digital-accessibility expectations, demonstrates its commitment to inclusion, and provides transparency for parents, carers, staff, and visitors who rely on assistive technology or alternative formats. Including an Accessibility Statement also helps users understand how to request support, report barriers, or obtain information in a different format, ensuring that the website is usable by everyone and reflects the school’s wider inclusive values.

10.1.4	Actively promoting and communicating an inclusive environment in your school
Best Practice	<p>Understanding your identity is an important part of a child’s development. It takes place in the early years of their lives and follows them into adulthood. Equality, diversity, and inclusion, SMSC and PSHE have a place in establishing what this will look like.</p> <p>Schools have a responsibility as educators to prepare the whole child and ensure that approaches are holistic and not simply academic.</p>

	<p>When promoting a healthy environment of inclusion, it is important to take stock of where your school is on the journey.</p> <p>The most inclusive schools will take into consideration the curriculum, staff, students, environment, information and display boards, and website when promoting a healthy inclusive environment.</p> <p>Schools should listen to the voices of their stakeholders. This includes staff, students, governors, and the community. All stakeholders must have a sense of connection and belonging.</p> <p>Sharing information on Equality and Diversity can happen in all aspects of school life. For example,</p> <ul style="list-style-type: none"> • Assemblies • Cultural evenings • Tutor time discussion • Trips • Student debates • Performances • Guest speakers • Visual displays • Podcasts • Resources • Library and other learning spaces • Extra-curricular activities
Audit Findings	<p>Allens Croft Nursery School is dedicated to creating an inclusive environment in which every individual is valued, respected, and supported. The school actively promotes diversity and inclusion through its daily practice, wider initiatives, and the way it communicates with its community. By acknowledging and celebrating a wide range of cultures, religions, abilities, and perspectives, the school ensures that all children, staff, families, and visitors feel genuinely welcomed and recognised.</p> <p>The school has clear policies and practices in place to uphold inclusivity and diversity among both students and staff. This commitment extends beyond policy into the lived experience of school life, where inclusion is embedded in the ethos and consistently reflected in routines, interactions, and celebrations. Allens Croft Nursery School also works closely with students, parents, and the wider community to foster an inclusive culture, valuing the contributions and voices of all those connected to the school.</p> <p>Its curriculum is intentionally designed to reflect the rich diversity of the local community and the city. Staff take time to understand each child’s unique story and strive to represent these experiences through the learning opportunities provided and the resources selected. This is an area the school continues to reflect upon and refine, ensuring that provision remains meaningful, representative, and inclusive for every child.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.1.5	Staff familiarity with technologies and support strategies and processes developed to assist people with disabilities
Best Practice	<p>Learning disabilities impact the way children are able to process and understand information; they are neurological disorders that might manifest themselves as difficulty listening, thinking, writing, speaking, spelling, or doing mathematical calculations. Dyslexia, dyscalculia, dysgraphia, dyspraxia, visual perception disorders, auditory processing disorders, and language disorders fall under the umbrella of learning disorders. Many children with ADHD also have comorbid learning disorders.</p> <p>An idea that teachers must understand is that students with special needs such as learning disabilities need to be taught differently or need some accommodations to enhance the learning environment.</p> <p>The following are best practice suggestions to help staff:</p> <p><u>Ongoing Professional Development</u>: Regular training sessions and workshops to keep staff updated on the latest assistive technologies and teaching strategies.</p> <p><u>Collaboration with Specialists</u>: Working closely with special education experts, occupational therapists, and speech-language pathologists to understand the specific needs of pupils and the best tools to support them.</p> <p><u>Hands-On Experience</u>: Providing opportunities for staff to use assistive technologies in real classroom settings, allowing them to become comfortable and proficient.</p> <p><u>Resource Sharing</u>: Creating a central repository of resources, including tutorials, guides, and best practice examples, that staff can easily access.</p> <p><u>Peer Support Networks</u>: Establishing support networks where teachers can share experiences, challenges, and solutions related to using assistive technologies.</p> <p><u>Feedback Mechanisms</u>: Implementing systems for staff to provide feedback on the effectiveness of technologies and strategies, ensuring continuous improvement.</p> <p>Not everyone learns in the same way, and teachers can follow some tips to create a well-rounded learning atmosphere:</p> <ul style="list-style-type: none"> • Maintain an organised classroom and limit distractions • Use music and voice inflection. • Break down instructions into smaller, manageable tasks. • Use multi-sensory strategies. • Give students with special needs opportunities for success.
Audit Findings	<p>Allens Croft Nursery School is committed to ensuring that staff are confident and well-equipped to support children with a wide range of needs, including disabilities and SEND. To achieve this, the school implements strong best-practice approaches, including regular professional development, opportunities for hands-on experience with assistive technologies, and ongoing collaboration with external specialists. Staff also benefit from</p>

	<p>resource-sharing systems, peer support networks, and effective feedback mechanisms that help refine practice and enhance confidence.</p> <p>Where individual needs require specific adaptations to the learning environment, the school responds thoughtfully and proactively. For example, children with autism (ASD) may be offered an individual workstation and supported through personalised visuals to help them navigate their day. Alternative methods of recording learning—such as scribing, the use of ICT, mind mapping, or photographs—are used when these approaches better meet a child’s needs. The school ensures that all equipment is accessible and usable for every child, regardless of ability, and works to guarantee that extra-curricular activities are fully accessible for pupils with SEND.</p> <p>Allens Croft Nursery School remains informed about the range of tools, technologies, and strategies that can assist children in their learning. In line with its duties under the Equality Act, the school is prepared to implement a variety of accessibility measures when needed, including text-to-speech software, coloured paper options, magnification aids, portable hearing induction loops in classrooms, and the accessibility features embedded within computer software. The school also ensures that information, when required, can be provided in accessible formats such as large print or Braille, demonstrating its ongoing commitment to inclusion.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.1.6	Complaints Process
Best Practice	<ul style="list-style-type: none"> • It’s in everyone’s interest that complaints are resolved at the earliest possible stage. Many issues can be resolved informally, without the need to follow formal procedures. Schools should take informal concerns seriously and make every effort to resolve the matter as quickly as possible. • Pupils, parents and visitors should be able to complain if their accessibility needs are not being met. • If a school's complaint procedure says you should write to the Headteacher, you should be allowed to make a verbal complaint if you are unable to write because of your impairment. • A school complaints procedure is an Ofsted publication requirement.
Audit Findings	<p>The Complaints Policy for Allens Croft Nursery School is available through the school’s website on the School Policies, Documents and Links page. It is listed among the shared policies used across the Birmingham Federation of Maintained Nursery Schools and is accessible via the link to the Federation’s policy collection. Additional related documents, such as the formal Complaints Policy required under DfE statutory guidance and the EYFS statutory framework, are also referenced within the Birmingham City Council policies section.</p> <p>The Complaints Policy outlines how parents, carers, and members of the community can raise concerns or complaints about any aspect of the school. It</p>

	<p>emphasises resolving issues informally wherever possible, encouraging families to speak directly with staff in the first instance so concerns can be addressed promptly and constructively. If the matter cannot be resolved informally, a structured formal process is available, beginning with a written complaint to the Headteacher and followed by a formal investigation. Clear timelines and expectations are provided to ensure transparency and fairness throughout.</p> <p>Where a complaint remains unresolved, it can be escalated to the Governing Board. The policy provides for an independent panel hearing, allowing complainants the opportunity to present their concerns and be accompanied if they wish. Throughout all stages, the policy stresses confidentiality, respectful communication, and equitable treatment for all parties. It also clarifies which issues must follow specialist procedures, such as safeguarding or staff conduct concerns.</p> <p>The website also explains that paper copies of any policy, including the Complaints Policy, can be provided on request with five days' notice, ensuring accessibility for all families.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.2. Access to Site and Facilities

An accessible school is one where the physical environment does not limit a pupil's ability to take advantage of the education (and other) opportunities on offer.

The purpose of this section of the access audit is to assess how well a site performs in terms of access and ease of use by a wide range of potential users, including people with disabilities. The audit provides a certain "snapshot" of a building at one point in its life. As the starting point of an ongoing access action plan, it can be used to highlight areas for improvement as well as a general risk assessment.

The physical environment includes steps, stairways, kerbs, exterior surfaces and paving, parking areas, building entrances and exits (including emergency escape routes), internal and external doors, gates, toilets and washing facilities, lighting, heating, ventilation, lifts, floor coverings, signs, interior surfaces, room décor and furniture.

Improvements to physical access include ramps, handrails, lifts, widened doorways, electromagnetic doors, adapted toilets and washing facilities, adjustable lighting, blinds, induction loops, communication aids, well designed (passive) room acoustics and way-finding systems. Improvements can also be made through rearranging room space, removing obstructions from walkways, changing the layout of classrooms, providing designated storage space or reallocating rooms to subject specialisms.

The most obvious part of a building, which determines its accessibility, is the shell. Decisions made by the architect can fundamentally affect the accessibility for a long time.

When the building is fitted out, fixtures and fittings can be critical. Most do not survive as long as the building itself, and if deficiencies are identified, these can be included in the next potential refurbishment.

A building is next furnished and equipped, and at this stage many mistakes can occur. Furnishings are generally short-lived so opportunities for improvement tend to occur more regularly.

Finally, as the building is occupied, the way it is used and managed becomes crucial. Accessibility is affected when bad housekeeping exists causing tripping hazards or, for example, over-zealous polishing leads to slippery floors. Continual monitoring by management therefore has a considerable role to play.

10.2.1	Access to Public Transport
Best Practice	<p>The most accessible schools will have effective access to public transport. Access to public transportation not only benefits students directly but also plays a significant role in building an inclusive and equitable educational system.</p> <p>The most accessible schools are those that are easily reachable from various parts of the community, ensuring that students have equal opportunity to access education regardless of their geographic location or socio-economic background. By being located near public transport hubs or having convenient bus routes, these schools eliminate potential barriers that may prevent students from attending or make their commute challenging.</p> <p>Depending on the locality, this could include airports, National & local bus routes, Railways, trams, underground or other light transit systems, cycle lanes, local taxi infrastructure. People with disabilities may rely on such services to reach the school.</p> <p>Effective access to public transport enables students to arrive at school safely, punctually, and in a more cost-effective manner compared to private vehicles. This is especially crucial in urban areas where congestion and limited parking spaces make driving to school impractical. Students who rely on public transport are also less likely to face issues such as traffic delays or car breakdowns, ensuring they can consistently attend school and participate fully in their education.</p> <p>Furthermore, providing easy access to public transport fosters a more sustainable and environmentally friendly school system. By encouraging students and staff to use public transport, schools contribute to reducing carbon emissions and alleviate traffic congestion around the premises. This not only benefits the environment but also helps create a healthier and more appealing learning environment for everyone.</p>
Audit Findings	<p>There is access to public transport from the school site.</p> <ul style="list-style-type: none"> • Does the school website provide links to route planning sites (e.g., Google maps etc)? Yes <p>There are a few benefits of adding a Google map with a ‘directions link’ to your website; It helps parents or visitors get instant directions to the school and saves users the steps of having to open a new browser window, leaving the schools’ website and finding directions by typing in the address or postcode. Potential visitors can simply use the map on your website which will also eliminate errors in typing, especially for those who find using technology difficult.</p>

Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.2.2	Arrangements for accessible parking
Best Practice	<p>For a number of wheelchair users and mobility impaired people it is very important that designated, well sized, accessible parking bays are provided as close as possible to the entrance points.</p> <p>If there is not sufficient size to allow a person to transfer from the car to a chair it may actually prevent that person from visiting the building at all or could result in them parking improperly causing an obstruction to other users.</p> <p>As a result, it is essential that an adequate number of well-designed accessible bays are provided. Directions to the disabled car parking are required to be placed at the entrance to the site so any disabled visitors know which way to go to access the designated disabled car park space.</p> <p>For a site of this type and use there is no specific guidance to follow but we would suggest that 5% of the overall parking provision should be made available for disabled use.</p> <p>Having provided well designed accessible parking it is equally important to ensure that pedestrian routes to and from the main disabled entrance are accessible as well as routes for other pedestrians.</p> <p>Routes should be level, free from steps, bollards and steep slopes which present difficulties for many disabled people. Moveable street furniture such as bins, seating and A-boards should be carefully located so as to not obstruct walking routes.</p> <p>Well-designed dropped kerbs with appropriate tactile paving should be provided where necessary.</p> <p>In addition, the hatched areas should allow a 1.2m access zone between bays at the side and 1.2m at the rear for easy boot access. Disabled users are likely to be more vulnerable to collision with traffic and a mobility impaired or elderly person is unlikely to be able to move as quickly as a disabled person. Equally a visually impaired person will be less aware of oncoming traffic. As a result, a safe route should be provided from accessible parking bays to the nearest exit or entrance.</p> <p>Any new bays should be designed to meet the requirements of BS8300: 2001. In effect this design ensures that the surface is relatively level, have a hard finish and free from stones, gravel etc.</p> <p>As well as a sign on the ground as provision for disabled drivers or passengers only, there should also be a sign immediately in front of the space, or to the side of the space, which is good practice. This is needed in case of snow or leaf covering on the ground. For wheelchair users, signs should be placed between 1000mm and 1100mm above floor level. The lettering should be in small case</p>

	<p>and should contrast with the sign board, and the sign should have a matt surface. Symbols can be used to supplement written signs.</p> <p>Pedestrian safety is a crucial aspect of parking lot design. Safe walkways are designed to provide a clear and safe path for pedestrians to walk on, away from moving vehicles. They are usually marked with bright colours and signs to make them easily visible. Pedestrian walkways are designated areas in car parks and school grounds, intended for those on foot. They lead to specific areas, such as entrances. The intent behind pedestrian walkways is safety, to keep people walking apart from those in vehicles and to reduce the incidence and possibility of accidents in the car park.</p> <p>Walking behind a parked car in a parking lot is generally safer than walking in between parked cars. This is because drivers are more likely to see pedestrians walking behind their car and can adjust their driving accordingly. Some car parks may even suggest that drivers reverse into the space to provide better visibility when exiting the car park. However, it is still important to be cautious and aware of your surroundings when walking in a car park.</p>	
<p>Audit Findings</p>		<p>At Allens Croft Nursery School, parking is available on site, including designated accessible bays.</p> <p>Since the last accessibility audit, the nursery has implemented many of the recommended improvements. The car park is located by the main NHS entrance, with a clearly marked pathway guiding parents and visitors directly to the nursery entrance.</p> <p>The school reminds parents to park sensibly and safely when collecting their children by sending regular text messages and letters, posting updates on social media, and maintaining a visible presence in the car park and outside the school to reinforce expectations.</p> <ul style="list-style-type: none"> • Does the school have safe walkways in the car park? Yes • Is there a sign at the entrance to the site showing the location of disabled parking? No – however they can be seen clearly from the entrance and so this is not needed. • Is there a sign (at a raised level) in front of the accessible parking bay/s? Yes • Are accessible parking bays correctly marked out? Yes
<p>Grade 2026</p>	<p>Exemplary</p>	
<p>Suggestions to improve/resolve</p>	<p>Maintain exiting actions and processes.</p>	

<p>10.2.3</p>	<p>Security Gates & Barriers</p>	
<p>Best Practice</p>	<p>Security and safety in schools is a highly emotive subject and one which is never far from the conscience of the head teacher, facilities team, governing body and LEA who all have roles to play in the implementation of an effective school security strategy.</p> <p>Through initiatives such as the Building Schools for the Future campaign, funding may be available for schools to upgrade perimeter security to the “duty of care” levels commensurate with the school/pupil relationship.</p> <p>Schools have a basic requirement to safely contain students in their care during school hours, keeping them protected from unwanted intruders and away from any danger within the confines of the grounds. After hours the school also needs to be able to ‘lock-down’ to deter acts of vandalism, theft, concealment and even arson.</p> <p>The physical security that surrounds a school site needs to be interfaced with intelligent access control solutions across the entire campus. Generally speaking, most schools (and nurseries) will require segregated access to the main reception from the car park, at which point all visitors are vetted and their reason for wanting to gain entry to be qualified prior to being granted access to the site. In the interest of safety, all access controls must work in conjunction with any fire alarm installation to ensure a speedy evacuation of the site when required</p> <p>All fencing, gate and access control solutions must be carefully considered to ensure they are compliant with the stringent safety regulations designed to minimise the risk of accidents. In infant and junior schools and for play areas, it is important to look for RoSPA approved and BS EN 1176 compliant products which have been tested for their ability to provide a safe fencing or gate solution, reducing the risk of puncture wounds or the entrapment of limbs. Schools selecting these products will significantly reduce the risk of public liability claims– an all-important consideration in today’s increasingly litigious society.</p> <p>Controls need to be accessible.</p> <p>Intercoms should be easy to use and have good signage.</p> <p>User operated parts to be highlighted including gate handles.</p>	
<p>Audit Findings</p>		<p>Allens Croft Nursery School takes the safety and security of its students and staff very seriously. They have implemented several measures to ensure that the school grounds are secure and that unauthorised individuals cannot enter the buildings freely. These measures include:</p> <p>Controlled Access: The school has controlled access points, with gates and doors that are locked during school hours. Visitors are required to sign in at the main reception and are issued visitor badges.</p>

		<p>CCTV Surveillance: The school grounds are monitored by CCTV cameras, which help to deter unauthorised access and ensure that any suspicious activity is quickly identified and addressed.</p> <p>Staff Presence: There is a strong staff presence throughout the school day, with staff members on duty during arrival, departure, and break times to monitor the grounds and ensure student safety.</p> <p>Secure Perimeter: The school has a secure perimeter, with fencing and gates that prevent unauthorised access to the school grounds.</p> <p>Visitor Protocols: All visitors to the school are required to follow strict protocols, including signing in and out, wearing visitor badges, and being escorted by a staff member if necessary.</p> <p>Regular Drills and Training: The school conducts regular safety drills and provides training to staff and students on emergency procedures, ensuring that everyone knows how to respond in case of an incident.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing action and processes.	

10.2.4	Access through the site to Reception
Best Practice	<p>The approach from gate to entrance doors should have:</p> <ul style="list-style-type: none"> • vehicular circulation that allows for public and private transport, including set-down and drop-off without congestion (for example, one way or roundabout traffic flow), and makes provision for emergency access and maintenance • designated safe pedestrian routes – some people have less awareness of the risks of traffic (or cannot see/hear vehicles). • easily accessible, level or ramped slip-resistant and well-drained surfaces along the route, without trip hazards and with an accessible stepped route nearby to give a choice. • suitable car parking, with accessible parking bays near the entrance • good quality external lighting for routes, clear legible signage, visual contrast and sensory wayfinding to help independence. Children may all enter the school through the main entrance, or there could be separate entrances, depending on the way the school is organised. • For younger pupils, entry might be via a gated or fenced area, with sheltered access and waiting areas.

	<p>The school building's entrance should be easily identified from a distance by its design, location, lighting and signage (tactile signs are generally not recommended for external use), and have:</p> <ul style="list-style-type: none"> • a level threshold with a safe, level drop-off zone that has, ideally, only shallow gradient ramps. • a canopy or covered access to the pavement for children transferring to or from buses or taxis. • sheltered, accessible waiting spaces - for parents with other children, if appropriate, and for children with SEN and disabilities to wait for assistance - with a visible, easily operated entry phone or intercom to reception. • easily operated doors, such as automatically operated sliding doors, with appropriate fail-safe mechanisms, wide enough and in a safe and secure position. • sufficient circulation space for people (including those in wheelchairs) to gather inside the building at the start and finish of the school day, avoiding congestion – safety is paramount, since this can be a particularly stressful time for some children. • a good visual link between inside and outside, so that reception staff can oversee and supervise easily (CCTV cameras should be discreet and not detract from the welcome or reduce accessibility).
<p>Audit Findings</p>	<div data-bbox="435 981 667 1128" data-label="Image"> </div> <div data-bbox="435 1151 667 1301" data-label="Image"> </div> <div data-bbox="435 1323 667 1473" data-label="Image"> </div> <div data-bbox="435 1496 667 1646" data-label="Image"> </div> <p>There are pedestrian entrances into the school grounds which are clearly marked with appropriate signage. The routes from these entrances to the main school buildings are smooth, unobstructed, and free from loose stones, ensuring they are safe and easy to navigate. These pathways are also well lit and free from hazards.</p> <p>Although the auditor visited during daylight hours, the routes were free from shadows that might otherwise present difficulties for those who are partially sighted. External street lighting is in place throughout the site and continues along the approach, providing essential visibility and safety for all visitors.</p> <ul style="list-style-type: none"> • Are there separate pedestrian and vehicle entrances to the site? Yes • Are pedestrian routes marked on the ground, signposted, and separated from vehicle routes by barrier so far as is reasonably practical? Yes • Are pavements in sound condition? Yes • Are approaches to Pedestrian entrances clear? Yes • Are grit bins provided for easy gritting of pedestrian routes in case of ice and snow? Yes

	<ul style="list-style-type: none"> • Are main entrance doors automatic or manual entry? Auto <p>The entrance is wide enough for a wheelchair to enter and is easy to locate. It is clearly distinguishable from the building front. It is well lit and free from shadows.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.2.5	Reception Facilities
Best Practice	<p>The reception space should be attractive, friendly and welcoming, with:</p> <ul style="list-style-type: none"> • a secure, draught-free, convenient and welcoming lobby, with outer and inner doors and security controls, giving reception staff better access control. • an easily identifiable reception counter, ideally facing onto the secure lobby, with a sliding window or glazed screen at an accessible height, a lower section and knee recess for wheelchair users, and a hearing loop. • waiting and seating areas with sufficient space for wheelchair users or people with buggies. • visual and/or tactile signage, sited where users can take time to read it. <p>An individual with a disability should be able to move about in the reception area without interference by furniture, planters or similar movable objects. Remember to consider persons with mobility and visual disability issues.</p> <p>The entrance/reception can offer a transition lighting zone where people with visual impairments can adjust between a bright exterior and a subdued interior - the receptionist's face should be clearly visible, avoiding down-lighting that casts shadows on the face of the receptionist or visitor. The following are also recommended:</p> <ul style="list-style-type: none"> • well organised safe display of children's work to promote a sense of achievement and belonging (without impeding circulation, causing hazards or obstructing lighting). • safe storage of personal belongings and mobility equipment, with battery charging close by, so that there can be easy transition between equipment from home and school. • accessible toilet(s)/changing room signposted nearby. • a parents' room (often) located nearby <p>Best Practices for interacting with disabled visitors:</p> <ul style="list-style-type: none"> • Friendly and Respectful Greeting: Welcome all visitors with a warm and friendly demeanour. Use respectful language and maintain eye contact. • Accessibility Awareness: Be aware of the accessible facilities available within the school, such as ramps, elevators, and accessible restrooms. Provide clear directions to these facilities.

	<ul style="list-style-type: none"> • Offer Assistance: Politely offer assistance to visitors who may need it. This could include help with opening doors, navigating the school grounds, or providing information. • Active Listening: Listen attentively to the visitor's needs and preferences. Show patience and understanding, especially if the visitor has difficulty communicating. • Clear Communication: Speak clearly and at a moderate pace. If the visitor has a hearing impairment, ensure that they can see your face while you speak. Use written communication if necessary. • Professionalism: Maintain a professional and respectful attitude at all times. Avoid making assumptions about the visitor's abilities or needs. • Confidentiality: Respect the visitor's privacy and confidentiality, especially when discussing personal or medical information. • Training: Ensure that all reception staff are trained in disability awareness and inclusive communication practices. Regular training sessions can help staff stay informed and prepared. 	
Audit Findings		<p>A wheelchair user can access the main entrance independently, and reception staff are attentive to the needs of disabled visitors, offering inclusive and supportive communication.</p> <p>On arrival, visitors are asked whether they would require assistance if the fire alarm were to sound.</p> <p>The manual doors are easy to operate, and the reception area includes a wheelchair-accessible counter as well as sufficient space for a wheelchair user to wait comfortably.</p> <p>Although there are no chairs available within the reception area itself, visitors can be seated in the staff room or on a chair positioned just outside the reception.</p> <p>Alternative signage in large print is available to support visitors with visual impairments. While an induction loop is indicated as necessary to assist hearing-aid users, there is currently no permanent system fitted in the reception area. Induction loops improve sound clarity for people with hearing loss by reducing background noise; when staff speak into the loop's microphone, the sound is converted into a magnetic signal that can be picked up by hearing aids set to the 'T' setting or equivalent programme.</p>
Grade 2026	Improvement Recommended	
Suggestions to improve/resolve	Install a portable hearing loop and clearly display the sign.	

Provide either signage or instructions from the reception area to the visitor's accessible toilet. For example:

Provide a seat with high back and arms for visitors. For example:

10.2.6	External areas, Movement between buildings
Best Practice	<p>(See Part M Access to buildings other than dwellings)</p> <p>Ramps should have the following dimensions: 1.5m wide with a minimum unobstructed width of 1.5m. Have a maximum individual flight of 10m and maximum gradients of 1:20 if longer than 5m, 1:15 if longer than 2m or 1:12 if shorter than 2m. Have 100mm high raised kerbs to any open side of ramp or landings</p> <p>Have a continuous suitable handrail on each side which is easy to grip: slip resistant, non-reflective and not cold to touch. Handrails to project 300mm beyond top and bottom landings with closed ends. Handrails to be between 900mm and 1000mm above surface or steps pitch line / 900mm and 1100mm above surface of landings. Handrail profile to be diameter between 40mm and 45mm (where circular) or Oval 15mm min radius (preferred solution) min 50mm width (refer diameter 7 A.D.M). Max 100mm projection into surface width of steps, landings or ramps. Clearance of between 60mm and 75mm between handrail and any wall surface. Min 50mm clearance between the cranked support and the underside of the handrail. Inner face to be N.M.T 50mm beyond the surface width of the ramp or step access.</p> <p>All steps in frequent use should be painted with contrasting nosings OR have tactile paving at the top and bottom of the flight of steps. This will alert a sight impaired person to a change in level. Nosings should be 2-inch strips which are painted or attached to the front and top of each step. Usually, yellow is used as it is a good contrasting colour. If nosings are not painted, then tactile paving should be used. Nosings, (stair edgings) are used to define the edges of steps in line with guidelines in Approved Document M (ADM) of The Building</p>

	Regulations 2010 and BS8300:2009+A1:2010. Nosings can help to reduce accidents on stairs and steps as well as helping to provide an 'inclusive' environment giving access to all school users.	
Audit Findings		<p>Paths and routes throughout the school site are safe, clearly marked, and well maintained. Surfaces and kerbs are kept in good condition and remain free from trip or safety hazards, ensuring that pupils, staff, and visitors can move around confidently. Pedestrian routes are fully separated from vehicle areas, helping to minimise risk and maintain a safe flow of movement across the site.</p> <p>There are some external steps within the play areas, all of which are fitted with appropriate nosings to improve visibility and reduce the likelihood of slips or trips. Handrails are installed on both sides, providing additional support for younger children, those with mobility needs, and anyone who may require extra stability. Although these steps are well equipped, the site does not currently have any ramps, which may limit accessibility options in certain areas.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing actions and processes.	

10.2.7	Emergency Evacuation & Lockdown procedures
Best Practice	<p>Schools must comply with the Regulatory Reform (Fire Services) Order 2005 to ensure that they have adequate fire precautions in place to allow the safe escape of all occupants in case of fire. Staff and students with disabilities should be able to evacuate a building promptly in the case of an emergency. Ensuring safe evacuation in an emergency is a complex issue, requiring consideration of a broad range of factors that it is not possible to cover in detail in this audit.</p> <p>Some areas for consideration include:</p> <ul style="list-style-type: none"> • the use of both visual and audible alarm systems, escape doors with opening devices and opening forces designed to meet the needs of both students and staff. • balancing personal dignity and independence with safety and speed of evacuation. • the risk of using lifts or evacuation chairs to evacuate people with mobility difficulties down or up to ground level. • ensuring that evacuation chairs are suitable for the intended users, ensuring that emergency contact facilities inside lifts (phones or intercom systems) are monitored at all times that the school may be used.

	<ul style="list-style-type: none"> • the needs of students who require personal care – for example, someone could be toileting with a career when the alarm is raised or other respiratory conditions in particular the possible impact of smoke on everybody, particularly students with asthma. • the use of zones and compartmentation to support phased evacuation of the building. • the use of vibrating alarms or other assistive technologies to raise the alarm for staff or students who are deaf or hard of hearing. • the location of assembly points to be reachable by all students. • Personal Emergency Evacuation Plans (PEEPs) for staff and students who may need assistance during evacuation. • making students aware of evacuation procedures, which should be practiced regularly throughout the school year. <p><u>PEEPS</u></p> <p>Not all SEND (Special Educational Needs and Disabilities) pupils need a PEEP (Personal Emergency Evacuation Plan) in place at school. PEEPs are typically created for students with mobility issues or other disabilities that may require special assistance during emergencies or evacuations.</p> <p>Each student's individual needs are taken into consideration, and if it is determined that a PEEP is necessary for their safety, one will be developed. However, not all SEND pupils require such plans, as their specific requirements may vary.</p> <p><u>Lockdown</u></p> <p>While specific details of the procedure are not publicly available, schools typically follow a set of standard practices during a lockdown, such as:</p> <p>Immediate Action: Teachers and staff secure classrooms, ensuring that all students are inside and away from doors and windows.</p> <p>Communication: Staff communicate with the school office to inform them of the lockdown and receive further instructions.</p> <p>Safety: Students are kept calm and quiet, and staff maintain a vigilant watch over the students until the lockdown is lifted.</p> <p>Training: Regular lockdown drills are conducted to ensure that both staff and students are familiar with the procedures.</p>
<p>Audit Findings</p>	<div data-bbox="434 1608 667 1937" data-label="Image"> </div> <div data-bbox="434 1787 667 1937" data-label="Image"> </div> <div data-bbox="794 1608 1390 2002" data-label="Text"> <p>Allens Croft Nursery School has a comprehensive approach to safety and security, which includes a lockdown procedure.</p> <p>The school has established evacuation routes that are clearly marked and regularly practiced through fire drills and other emergency procedures. These routes are designed to ensure a swift and orderly evacuation in case of an emergency. The school also has designated assembly points where students and staff gather</p> </div>

	 	<p>during evacuations to ensure everyone is accounted for.</p> <ul style="list-style-type: none"> • Are staff trained in emergency evacuation procedures? Yes • Are fire drills/emergency evacuations are rehearsed termly? Yes • Do pupils with physical impairments have Personal Emergency Evacuation Plans in place? Yes <p>The school has ensured that all necessary fire risk assessments have been carried out with all fire extinguishers checked and serviced annually.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing action and processes.	

10.2.8	Internal movement – corridors and evacuation routes	
Best Practice	<p>According to ADM the following apply:</p> <ul style="list-style-type: none"> • Corridor unobstructed widths of 1200mm with 1800mm by 1800mm passing places or 1800 width without passing places. Passing places to be at reasonable intervals. • Projections into the corridor to have contrasting guardrails. • Floors to be level – max gradient 1 in 60. Any gradients steeper than 1 in 20 to be designed as ramps. • Ramps less steep than 1 in 20 to have max rise 500mm with 1500mm long rest landings. • No door to open across the corridor (doors should be recessed back from corridor) - except a unisex toilet door where the corridor is 1800mm wide. • Some minor utility cupboards can outward open i.e., small store cupboards. • Slip resistance floor surfaces. Avoid patterns to floor coverings. • Glazed screens alongside the corridor to have manifestation at two levels. • Projections to be protected with contrasting guardrails. 	
Audit Findings	 	<p>Allens Croft Nursery School has a well-organised internal movement system that supports both safety and an efficient flow of pupils and staff. The corridors are wide, bright, and easy to navigate, allowing smooth movement between classrooms and shared areas.</p> <p>Clear signage is displayed throughout the building to guide users to classrooms, offices, and communal spaces, ensuring that all areas are easy to locate. All corridors and circulation</p>

		<p>routes have non-slip surfaces and are kept free from trip hazards, creating a safe environment for all.</p> <p>Regular systems are in place to ensure that key routes remain safe and accessible. Corridors and escape routes are systematically checked to confirm that they are free from obstructions. Wheelchair users are also able to reach and operate emergency fire exit devices without assistance, supporting independent evacuation where safe to do so.</p> <p>In addition, the school routinely checks that all floor surfaces remain free from slip and trip hazards, helping maintain consistently high safety standards throughout the building.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing action and processes.	

10.2.9	Internal movement – stairs and lifts
Best Practice	<p>The design for internal stairs, steps and ramps is the same as the external stair dimensions. see previous notes which also apply to handrails. Steps 12 risers maximum to a landing, but exceptionally no more than 16 in small premises where plan area is restricted. Rise of between 150mm and 170mm and going at least 250mm. (150mm max rise / min 280mm going for schools). No need for tactile warnings as external stairs. Provide guarding under landings less than 2100mm to prevent visually impaired walking into them.</p> <p>Ramps - Where the change in level is more than 300mm – 2 or more clearly signposted steps must be provided in addition to ramp. Where the change in level is less than 300mm – a ramp is to be provided instead of a single step. All landings to be level – subject to a max 1 in 60 gradients along their length. Provide guarding under landings less than 2100mm to prevent visually impaired walking into them.</p> <p>A.D.M recommends:</p> <p>Lifting Devices</p> <p>Passenger lifts preferred option for all buildings, however for existing buildings in exceptional circumstances a platform lift may be considered and in exceptional circumstances, in an existing building giving access to a small area with a unique function, a wheelchair platform stair lift could be considered. All new developments to have a passenger lift provided serving all storeys. An unobstructed manoeuvring space of 1500mm x 1500mm or 900mm straight access route to the lift.</p> <p>Landing call buttons located between 900mm and 1100mm – 500mm from any return wall, with raised symbols for tactile reading. Controls to have</p>

	<p>contrasting finish from background. Avoid dark colours to car floor and ensure floor frictional qualities similar or higher than the landing floor.</p> <p>A handrail on one wall 900mm above the floor.</p> <p>An emergency communication system.</p> <p>Passenger Lifts</p> <p>Lift car to be designed in accordance with A.D.M. - 1100mm wide x 1400mm deep and the provision of a mirror to allow wheelchair user to see behind. Min 800mm clear width of opening doors – doors to have timing and re-opening activators to allow for people to enter or leave car. Doors to contrast surrounding surfaces. Car controls between 900mm and 1200mm. Audible and visual indication of lift arrival and location in and out the car. Avoid use of visually and acoustically reflective wall surfaces</p> <p>Lifting Platforms</p> <p>Vertical travel distance of 2.0m maximum with no enclosure and no floor penetration. More than 2.0m with a lift enclosure. Over 3m travel a product certificate issued by a Notified Body is required. Continuous pressure controls located between 800mm and 1100mm and at least 400mm from any return walls. Landing call buttons located between 900mm and 1100mm – 500mm from any return wall, with raised symbols for tactile reading. Controls to have contrasting finish from background. Three platform sizes depending on enclosures and accompanied or not; 800mm wide x 1250mm deep minimum – non-enclosed platform and no provision made for wheelchair companion. 900mm wide x 1400mm deep minimum – enclosed platform and no provision made for wheelchair companion. 1100mm wide x 1400mm deep minimum – 2 doors at 90 degrees relative to each other / enclosed platform and provision made for wheelchair companion.</p>
<p>Audit Findings</p>	<div data-bbox="434 1249 667 1397" data-label="Image"> </div> <div data-bbox="434 1420 667 1568" data-label="Image"> </div> <div data-bbox="434 1590 667 1738" data-label="Image"> </div> <div data-bbox="434 1760 667 1908" data-label="Image"> </div> <p>Because the nursery operates entirely on the ground floor, children never need to access the upper level. On occasion, visitors, parents, or staff may use one of the family rooms located upstairs for meetings; however, nursery staff make every effort to hold such meetings on the ground floor whenever possible. As there may still be occasional reasons to use the first-floor facilities, these areas have been included within the audit findings.</p> <p>There are two sets of internal steps within the building, each designed with consistent treads and risers to support safe movement. The nosings are clearly identifiable, reducing the risk of trips, and the staircases are well lit, with maintained illuminance measured at 100 lux and no shadows that could impair visibility. Both sets of stairs are fitted with correctly designed, continuous handrails, and the start and end points are clearly marked for safety.</p>

		A suitable passenger lift is available for wheelchair users and others who may require assisted access between floors. On-site building staff are trained in emergency lift-release procedures in the event of a mechanical failure, including situations where the lift stops between floors. In addition, emergency evacuation chairs are provided, and staff are trained to use them should lifts need to remain out of service during an evacuation, such as when a fire alarm is activated.
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing action and processes.	

10.2.10	Accessible toilets
Best Practice	<p>An accessible toilet is designed to meet the majority of needs of independent wheelchair users and people with mobility impairments, as well as the additional requirements of people with bowel and bladder conditions (such as colostomy bag users). It also helps people with other physical conditions such as impaired dexterity and grip, balance and other conditions where physical support from grab rails and the presence of an emergency alarm is helpful.</p> <p>Each toilet for disabled pupils needs to contain one toilet and one washbasin (and possibly a shower or other wash down fitting) and have a door opening directly onto a circulation space that is not a staircase, and which can be secured from the inside. Where possible, the number and location of accessible toilets will be sufficient to ensure a reasonable travel distance for users that does not involve changing floor levels</p> <p>A.D.M recommend:</p> <p>Wheelchair accessible unisex toilet provision One located near to entrance and/or waiting area in a building. Not located in a way that compromises privacy of users.</p> <p>Located in similar position of each floor of a multi-storey building with choice of transfer layouts on alternate floors. Choice of transfer layouts when more than one unisex toilet is available. Where W.C is the only one in a building the width must be increased to 2000mm to accommodate an additional standing W.C located on accessible routes that are direct and obstruction free. 40m maximum travel distance to an accessible toilet. Travel between floors restricted to one floor if a lifting platform is only provided. Doors to outward open – with horizontal closing bar to rear. Heat emitters not to restrict wheelchair manoeuvring space or space beside W.C</p> <p>Toilets in separate sex washrooms Ambulant disabled people should be able to use a W.C compartment within any separate sex toilet washroom. 450mm diameter manoeuvring space is provided in cubicle between door swing and edge of pan. Minimum</p>

	<p>dimensions of compartments for ambulant disabled people. Compartment doors for ambulant disabled people preferably open outward. One low level washbasin and urinal with vertical grab bars.</p> <p>The following recommendations should form part of an overall good housekeeping policy:</p> <p>Accessible toilets should never be used for miscellaneous storage.</p> <p>Lighting that is triggered by movement can be dangerous in an accessible toilet, as a disabled user may not have sufficient movement ability to trigger the lights if they go out.</p> <p>Cleaning and housekeeping staff should have induction training to ensure they understand the need to keep transfer zones, cistern tops and shelves in accessible</p> <p>WC's clear at all times and never to tie up alarm pull cords.</p> <p>Boxing in of pipes etc., and the addition of vanity units around basins can compromise important reach and spatial needs.</p> <p>Maintenance, refurbishment and decoration of toilet facilities should be scheduled in advance, at times to minimise inconvenience.</p> <p>Including a shelf in accessible toilets is recommended by accessibility standards and guidelines, such as the British Standards BS8300, which emphasise the importance of convenient shelving for individuals to store their personal belongings in sanitary accommodations. For individuals with medical conditions such as colostomies, a shelf can be essential for changing and managing their medical appliances. It provides a clean and stable surface to place their supplies and perform necessary tasks.</p> <p>In principle, suitable sanitary accommodation should be available to everybody, including sanitary accommodation designed for wheelchair users, ambulant disabled people, people of either sex with babies and small children or people encumbered by luggage. A number of issues need to be considered in connection with all forms of sanitary accommodation. These relate to the needs of people with visual or hearing impairments, people with learning difficulties and people whose lack of tactile sensitivity can cause them to be injured by touching hot surfaces. Taps and WC cubicle doors should be operable by people with limited strength or manual dexterity and doors to cubicles should be capable of being opened if a person has collapsed against them while inside the cubicle. Preferably, all doors to WC cubicles and wheelchair- accessible unisex toilets open out or, if they open in, the door swing should not encroach into the wheelchair turning space or minimum activity space. Where possible, light switches with large push pads should be used in preference to pull cords.</p>
<p>Audit Findings</p>	<div data-bbox="434 1832 780 1982" data-label="Image"> </div> <p>The nursery provides adequate accessible toilet facilities, all of which are gender-neutral and self-contained. However, the accessible toilet within the nursery is currently being used as a storage space, and therefore the signage should</p>

	 <p>Below - This sign should be removed as the toilet is now used for storage.</p> 	<p>be removed from the door until it is returned to appropriate use.</p> <p>All fittings within the accessible toilets comply with the relevant code of practice. While sinks, hand-drying facilities, mirrors, and other essential features are installed at accessible heights, some toilets lack shelves and coat hooks positioned appropriately for users who may need them. These should be installed where required to ensure full accessibility.</p> <p>The flooring within the accessible toilets is slip-resistant, supporting safe and independent use. Emergency pull cords are fitted correctly, left untied, and remain fully functional. Emergency beacons are installed both outside the toilet and in a staffed area to ensure alerts are seen promptly, and staff have been trained in how to respond appropriately when an alarm is activated. In addition, the toilets are equipped with flashing fire alarms to support deaf and hard-of-hearing users.</p>
Grade 2026	Improvement Recommended	
Suggestions to improve/resolve	<p>The accessible toilet in the nursery is now used as a storage facility and so the sign should be removed from the door.</p> <p>Check that all accessible toilets have coat hooks, a shelf for belongings and a mirror at an accessible height.</p>	

10.2.11	Changing Rooms
Best Practice	<p>Best practices for changing rooms in schools focus on ensuring safety, privacy and inclusivity for all pupils.</p> <p>Changing Areas</p> <ul style="list-style-type: none"> • Separate Spaces: Where possible, use designated single-gender changing rooms or areas. If boys and girls must change together, use furniture or screens to provide separate areas. • Privacy and Dignity: Treat all pupils fairly and with respect for their privacy and dignity. Make arrangements that consider the needs of pupils with disabilities, different religions, beliefs, cultural backgrounds, or gender identities. <p>Supervision</p> <ul style="list-style-type: none"> • Proximity: It should not be necessary for adults to remain in the room to maintain good behaviour; being in close proximity and pupils being aware of this should be enough.

	<ul style="list-style-type: none"> • Gender-Sensitive Supervision: Female staff should supervise girls and male staff should supervise boys. Avoid adults of the opposite gender standing in the changing room watching pupils. <p>Assistance for Pupils with Additional Needs</p> <ul style="list-style-type: none"> • Intimate Care Policy: Refer to the school’s Intimate Care Policy for assisting children who are disabled or require additional support. • Sensitive Arrangements: Make adequate and sensitive arrangements for changing that take into account the needs of pupils with disabilities. <p>Safeguarding</p> <ul style="list-style-type: none"> • Announcing Entry: If an adult needs to enter the room, they should alert pupils by announcing it to give them the opportunity to cover up if they want to. • Code of Behaviour: Establish a code of behaviour with pupils so they are clear about expectations while they are unsupervised
Audit Findings	Not applicable, there are no changing rooms at Allens Croft Nursery School, only baby changing facilities.
Grade 2026	N/A
Suggestions to improve/resolve	N/A

10.2.12	Medical Facilities
Best Practice	<p>Ensuring that schools have adequate medical facilities is crucial for the health and well-being of students. Here are some best practices for providing medical facilities in schools:</p> <p>General Medical Facilities</p> <ul style="list-style-type: none"> • First Aid Kits: Ensure that first aid kits are well-stocked and easily accessible in various locations around the school. • Medical Room: Have a dedicated medical room equipped with basic medical supplies and equipment. • Trained Staff: Employ trained healthcare professionals, such as school nurses, to provide medical care and support. <p>Medication Management</p> <ul style="list-style-type: none"> • Individual Healthcare Plans (IHCP): Develop IHCPs for students with chronic illnesses or specific medical needs. These plans should outline the steps the school needs to take to support the student’s healthcare needs during the school day.

- **Medication Storage:** Store medications securely and ensure they are easily accessible when needed. Regularly check the expiry dates on medications.
- **Administering Medication:** Have clear protocols for administering medication, including obtaining parental consent and keeping accurate records of medication administered.

Emergency Preparedness

- **Emergency Procedures:** Develop and practice emergency procedures for medical situations, including how to handle severe allergic reactions, asthma attacks, and other medical emergencies.
- **Emergency Contacts:** Maintain up-to-date emergency contact information for all students.

Health Education and Preventive Measures

- **Health Education:** Promote health education and preventive measures, such as good hygiene practices, healthy habits, and disease prevention.
- **Regular Health Check-Ups:** Conduct regular health check-ups and vaccinations to ensure students' well-being.

Mental Health Support

- **Counseling Services:** Provide counseling services and support groups to address mental health concerns and promote emotional well-being.
- **Mental Health Awareness:** Raise awareness about mental health issues and provide resources for students and staff.

Communication and Collaboration

- **Parental Involvement:** Collaborate with parents to ensure they are informed about their child's medical needs and any changes in their health status.
- **Staff Training:** Train staff on how to support students with medical needs and how to respond to medical emergencies.

Implementing these best practices can help create a safe and supportive environment for students, ensuring their health and well-being are prioritised.

Defibrillators in Schools

Every year an average of 270 children dies at school in the UK from sudden arrhythmic death syndrome. Oliver King died aged just 12 years old when he suffered a cardiac arrest while taking part in a swimming race in 2012. Since then, Mark King, Oliver's dad, has campaigned for defibrillators to be made more widely available. Last year, 2022, legislation was introduced that all schools would be supplied with a defibrillator.

There is clear evidence showing that defibrillators drastically increase the chance of survival from a cardiac arrest – meaning if a defibrillator had been available then, Oliver could have survived.

	<p>Defibrillators have the potential to save the lives of pupils, staff and visitors in schools, with research showing that accessing these devices within 3-5 minutes of a cardiac arrest increases the chance of survival by over 40%.</p> <p>It's particularly important that they are available close to sports halls and playing fields that children, young people, and the wider community use daily.</p> <p>In 2013, The Oliver King Foundation helped to secure a change in government policy where all schools are recommended - but not obliged - to purchase a defibrillator.</p> <p>The first defibrillators were issued to schools on 20 January 2023 marking the start of a roll out of over 20,000 devices to almost 18,000 state-funded schools in England. The rollout is expected to be complete by the end of the academic year.</p> <p>The biggest and proudest achievement has been a meeting in March 2022 with Secretary of State for Education Nadim Zahawi. Every school in England should now be receiving a defibrillator. However, we know that this is not the case.</p> <p>The updated guidance can be found at: https://www.gov.uk/government/publications/automated-external-defibrillators-aeds-in-schools</p>
<p>Audit Findings</p>	<div data-bbox="434 936 667 1093" data-label="Image"> </div> <div data-bbox="434 1115 667 1272" data-label="Image"> </div> <div data-bbox="434 1294 667 1451" data-label="Image"> </div> <div data-bbox="434 1473 667 1630" data-label="Image"> </div> <p>Allens Croft Nursery School is committed to providing effective emergency first aid provision to ensure that accidents and incidents involving employees, children, and visitors are managed promptly and safely. The school has taken steps to ensure that first aid resources are adequate, accessible, and appropriate so that every pupil, member of staff, and visitor can receive suitable care in the event of illness, injury, or any unexpected situation, whether minor or more serious.</p> <p>Although the nursery does not have a designated medical room, several well-equipped first aid stations are available throughout the building. These areas are wheelchair accessible, ensuring that individuals with mobility needs can be treated without difficulty. They are also positioned so that ambulances or parents' vehicles can reach them easily if required. Privacy is maintained during the administration of first aid or routine medication, allowing pupils to preserve their dignity while receiving care.</p> <p>The nursery also has a defibrillator on site, supporting a rapid response in the event of cardiac emergencies. Staff members appointed as first aiders have been trained in CPR and are prepared to respond quickly and confidently should such a situation arise.</p>

Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes. If a school believes they are eligible for the defibrillator program but hasn't received their defibrillator yet, they should contact the Department for Education at AED.Operations@education.gov.uk.

10.2.13	School Signage (Internal and External)
Best Practice	<p>In order that signs can firstly be located and then read it is important that signboards are well contrasted to their background. Arrows can be useful to signs, but they can also be very confusing if not applied correctly. In general, signs should be designed so that arrows directing users to the left, up or down are set to the left-hand side of the lettering. Arrows directing to the right should be to the right-hand side of the lettering. As this is the Standard method, any sign adopting a different approach may prove confusing for the visually impaired person or someone with learning difficulties.</p> <p>Using colour as an additional aid to wayfinding works well in schools, as it works almost subconsciously and can be easily introduced as part of the décor or on the signs themselves. You can then co-ordinate this with a particular activity or part of the site. For example, if you had two car halls, you would be able to ask visitors to “go to the lower hall (follow the orange signs)” or “follow the brown signs for the sports facilities”. Choose colours that are different to the background they’ll be seen against (for example avoid green signs in areas that are predominantly trees, bushes and grass).</p> <p>Tactile information such as Braille and/ or embossed text will be helpful to some and is critical on certain signs, such as toilet doors. It is possible to add Braille information using a transparent self-adhesive tape below an existing sign, on a temporary notice or even on files, lockers and equipment. There is a Dymo label maker for this, costing circa £50 but you may find a local sensory services department will offer to do this at the cost of just the tape used. The most widely used tactile information is a 19 embossed symbol or text. The RNIB also sell a product called Tactimark pen which is a plastic writing tube with gel with which you can create freehand text or lines – the substance dries to give an embossed finish. It is available in black, white and orange at about £6 a tube. Embossed lettering is only helpful when in easy reach (such as on a door 1500mm high or below) and it needs to be of sufficient size to be legible by touch - minimum 15mm height of initial capital letter and 1mm raised depth from the background.</p> <p>By matt laminating a simple computer print-out of appropriate text and/or symbols and applying Tactimark pen or some Braille self-adhesive labelling it is possible to create e your own notices and signs in an accessible way. (Always use matt laminating sheets. They are only marginally more expensive and do not have the high reflectance which makes most laminated notices difficult to read under direct light or sunlight.) A painted or taped line in a distinct colour is a simple solution to some situations that are difficult to cover in signage. This can be very helpful for external environments, where the destination does not have line of sight from the departure point. Some people with visual impairments lose their ability to see colours clearly. It is therefore helpful to</p>

	<p>combine a colour with a shape, where possible – for example an orange triangle or a blue circle etc.</p> <p>Signage in uppercase is not recommended for use in schools for several reasons:</p> <p>Readability: Uppercase text can be harder to read, especially for young children who are still learning to read. The lack of lowercase letters can make words look like a continuous string, which can be confusing.</p> <p>Visual Fatigue: Reading all uppercase text can cause visual fatigue more quickly than mixed-case text. This can be particularly problematic in a school environment where students are exposed to a lot of written information.</p> <p>Accessibility: For students with dyslexia or other reading difficulties, uppercase text can be more challenging to process. Using mixed-case text can help improve readability and comprehension for these students.</p> <p>Professional Appearance: Mixed-case text often looks more professional and is easier on the eyes. It can make signs, and other printed materials appear more polished and easier to navigate.</p> <p>Using mixed-case text with appropriate capitalisation can enhance readability, reduce visual fatigue, and create a more inclusive and accessible environment for all students. Using a combination of uppercase and lowercase letters generally provides a better balance of readability, legibility, and visual appeal.</p> <p>Signs should be provided at each decision point where a choice of routes is available, for example more than one pathway or corridor, or a series of doors.</p> <p>External spaces can be a particular issue, as there is often limited visual contrast around green space and the route someone may take is not as regulated as indoors.</p> <p>Making routes and directions clear is very important. Some disabled people need to conserve their energy and not waste it walking around areas trying to find their destination. Others will experience fatigue, breathlessness or pain and discomfort.</p>
<p>Audit Findings</p>	<div data-bbox="443 1447 676 1599" data-label="Image"> </div> <div data-bbox="443 1621 676 1774" data-label="Image"> </div> <div data-bbox="443 1796 676 1948" data-label="Image"> </div> <p>Allens Croft Nursery School uses clear and prominent signage throughout the site to ensure easy navigation and accessibility for all students, staff, and visitors.</p> <p>Directional Signs: These are placed at key points around the site to guide people to different buildings, classrooms, and facilities. They often include arrows and building names to make navigation straightforward.</p> <p>Informational Signs: These provide important information about specific areas, such as entrances, exits, and restricted zones. They are designed to be easily readable and include symbols where necessary.</p>

		<p>Safety Signs: Safety signs are used to alert students and staff to potential hazards and indicate emergency exits, fire extinguishers, and first aid stations. These are typically in bright colours to ensure they are easily noticeable.</p> <p>Consistency: All signs follow a consistent design scheme, including the school's colours and logo, to create a cohesive look and feel across the campus.</p> <ul style="list-style-type: none"> • Are signs placed at an appropriate height to ensure they are visible to both children and adults? Yes • Are signs positioned in well-lit areas to maintain visibility even in low light conditions? Yes <p>Main Entrance and Reception: Clear signs indicate the main entrance and guide visitors to the reception area.</p> <p>Classrooms and Buildings: Each classroom and building has a sign with its name and room number, making it easy to locate specific areas.</p> <p>Pathways and Outdoor Areas: Directional signs along pathways help guide students and staff to different parts of the school, including playgrounds, sports facilities, and outdoor learning spaces.</p>
Grade 2026	Improvement Recommended	
Suggestions to improve/resolve	<p>Review internal signage and ensure it is all in both uppercase and lowercase lettering. Consider adding an option in Braille. For example:</p> 	

10.2.14	Internal Décor, Finishes and Lighting	
Best Practice	<p>Best practices for internal décor, finishes, and lighting in schools focus on creating a safe, comfortable, and conducive learning environment.</p> <p>Lighting:</p> <ul style="list-style-type: none"> • Natural Light: Maximise the use of natural light to create a bright and welcoming atmosphere. Use large windows and skylights where possible. 	

	<ul style="list-style-type: none"> • Artificial Lighting: Ensure that artificial lighting is well-distributed and provides adequate illumination for all areas. Use energy-efficient LED lighting to reduce energy consumption and maintenance costs. • Task Lighting: Provide task lighting in specific areas, such as reading corners, computer stations, and laboratories, to enhance visibility and reduce eye strain. • Avoid Glare: Minimise glare by using diffused lighting and appropriate window treatments, such as blinds or shades. <p>Décor and Finishes:</p> <ul style="list-style-type: none"> • Colour Scheme: Use a calming and neutral colour palette for walls and floors to create a serene learning environment. Incorporate accent colours to add visual interest and stimulate creativity. • Durable Materials: Choose durable and easy-to-clean materials for floors, walls, and furniture to withstand the wear and tear of daily use. • Acoustic Treatments: Implement acoustic treatments, such as sound-absorbing panels and carpets, to reduce noise levels and improve concentration. • Safety: Ensure that all finishes and materials are non-toxic and meet safety standards. Avoid sharp edges and use slip-resistant flooring in high-traffic areas. <p>Flexibility and Adaptability:</p> <ul style="list-style-type: none"> • Modular Furniture: Use modular and movable furniture to create flexible learning spaces that can be easily reconfigured for different activities and group sizes. • Multi-Functional Spaces: Design spaces that can serve multiple purposes, such as classrooms that can be converted into meeting rooms or collaborative workspaces. <p>By following these best practices, schools can create a safe, comfortable, and stimulating environment that supports effective learning and well-being for all students.</p>
<p>Audit Findings</p>	<div data-bbox="443 1563 678 1720" data-label="Image"> </div> <p>None of the décor is confusing or disorienting for disabled pupils with visual impairment, autism or epilepsy.</p> <p>The school has ensured tonal contrast between different features to help people with vision loss in a number of ways: floors contrast with walls which helps indicate the size of a room; handrails contrast with the walls indicating their location; and doors contrast with their surrounding indicating their position and helping with wayfinding.</p> <p>Sights, sounds, sunlight, changes in barometric pressure, smells, touch, and colours can all have a</p>

		<p>profound effect on children with autism. The school has taken these factors into account and have used blinds at classroom windows and decorated in calm and subtle colours.</p> <p>They have avoided decorating with glass or mirrors as these are known to contribute to epileptic fits to children who suffer from this condition. There are no floor or table lamps, and all the lighting is overhead. Any flickering lights at a certain speed and brightness (e.g., from televisions, computer screens) can trigger a seizure in people with photosensitive epilepsy. The school is aware of this and have a register of their epileptic children and the information is passed onto staff.</p> <ul style="list-style-type: none"> • Are all areas to which disabled, and SEN pupils have access well lit? Yes • Is there a provision of blinds and curtains to control glare and reflections? Yes <p>Much of the lighting has been replaced by LED lighting with automatic sensors. Unlike fluorescent lighting, LEDs are mercury-free and are 100% recyclable—making them the most environmentally safe lighting option. Using less energy than any lighting technology on the market, LEDs cut energy and maintenance costs drastically.</p> <p>When overviewing a school’s expenses, energy is one that can be decreased without negatively impacting student learning. By replacing a T12 fluorescent tube with a LED T8, a facility can reduce its energy consumption by 35 percent. Then adding options such as reflectors, lenses, sensors and timers can increase the savings even more.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing action and processes.	

10.2.15	Intervention Rooms, Sensory Rooms and Quiet Corners
Best Practice	<p>Having an Intervention Room or designated quiet spaces in a school is crucial for pupils with SEND (Special Educational Needs and Disabilities). These students may require extra support and may have difficulty managing their emotions or focusing in a traditional classroom environment.</p> <p>By providing a separate space for targeted support, pupils can receive tailored assistance from teachers, or other trained professionals in a calm and controlled space.</p>

	<p>This can include one-to-one intervention sessions, sensory breaks, or simply a quiet space to recharge. Without these support systems, pupils may struggle to access education, feel overwhelmed, or even become disengaged from school altogether.</p> <p>A sensory room employs sensory-controlled techniques to bring about positive effects in individuals who struggle with sensory-overload. The benefits of having sensory or quiet rooms in schools are abundant. Providing a safe and supportive space to escape the noise of a busy classroom is vital.</p> <p>Some children, such as those on the autism spectrum, can easily become overwhelmed by touch, movement, sights, or sounds. Spending time in a calming sensory room might help them build intrinsic self-regulation skills to support better focus, attention, and behaviour.</p> <p>It is the school’s responsibility to ensure that every student, regardless of their abilities, has access to the tools they need to succeed.</p> <p>If a full Intervention Room cannot be accommodated, even a small quiet corner or designated space can make a huge difference.</p> <p>Ultimately, having additional support spaces available will benefit pupils, their learning, and their overall wellbeing.</p>
<p>Audit Findings</p>	<div data-bbox="438 936 670 1624" style="display: flex; flex-direction: column; align-items: center;">     </div> <p>At Allens Croft Nursery School, inclusion is at the heart of everything they do. The nursery is well-known for welcoming children with a wide range of needs and for creating a learning environment where every child feels safe, supported, and valued. Staff work thoughtfully to ensure that all children can take part in play, learning, and daily routines alongside their friends.</p> <p>To support children who may need a quieter space, the nursery provides calm, comfortable rooms where children can go if they are feeling overwhelmed or simply need a moment to rest. There are also cosy, dedicated quiet corners throughout the setting that children can use whenever they need a break from busy play. For children who may feel unsure or lonely at times, staff ensure that there are friendly, inviting spaces where they can find company, comfort, and the chance to build new friendships.</p> <p>Allens Croft Nursery School is committed to making sure that every child has what they need to flourish, both emotionally and socially, in a warm and inclusive early years environment.</p>
<p>Grade 2026</p>	<p style="text-align: center;">Compliant</p>
<p>Suggestions to improve/resolve</p>	<p>Maintain existing action and processes</p>

10.2.16	Dining and Catering
Best Practice	<p>Where dining, eating or food preparation facilities are provided; care should be taken to ensure that all students and staff members can safely and independently use the facility.</p> <p>Dining environments should not be viewed as purely functional but should be structured to facilitate social interaction and inclusion with peers.</p> <p>Tables should be accessible to wheelchair users.</p> <p>Aisles should be wide enough to allow students carrying trays to safely pass.</p> <p>Self-service shelves and dispensers for cutlery and condiments should be within reach of wheelchair users and people of small stature.</p> <p>Tray slides allow trays to be rested while moving along a counter. These should be continuous to reduce the chances of dropping trays, and have knee space underneath to accommodate wheelchair users</p> <p>The biggest issue in many dining areas in schools is the acoustics – lots of hard finishes can create considerable echo, which is very difficult for people with sensory impairments.</p> <p>Introducing some soft finishes, such as chairs or screens with fabric, curtains etc., will help a little.</p> <p>Refreshment areas have similar needs to reception waiting areas in terms of a mix of seating styles. If all chairs are without arm supports, consider changing some for sturdy chairs with arm supports. If your tables and chairs are fixed, these will be quite difficult for many disabled pupils to access, and it would be beneficial to supplement or exchange one or two fixed units with some freestanding tables and chairs. This offers flexibility for all needs.</p> <p>Ensure aisles between tables are kept clear – at least one aisle should be wide enough for a wheelchair user to turn (1500mm width needed), and the under-table clearance height should be at least 700mm for comfortable wheelchair access.</p> <p>Whilst ideally serving counter heights should not be too high (850mm recommended), this can be overcome by someone else bringing items to the table. This is a recommendation anyway for items where it would be difficult or potentially dangerous for a physically disabled person to carry (for example hot drinks).</p> <p>Plain crockery is easier for someone with a visual impairment but must contrast from the tables on which they will be placed. A mix of cups with and without handles is also useful.</p> <p>Best practices for schools to manage food allergies and dietary restrictions when preparing school lunches include:</p> <ol style="list-style-type: none"> 1. Clear Allergy Policies: Develop and implement clear and concise allergy policies that outline procedures for managing allergies within the school premises. Ensure these policies are communicated effectively to all staff, parents, pupils, and caterers.

	<ol style="list-style-type: none"> 2. Education and Training: Provide regular training for catering staff and teachers on food allergies, cross-contamination prevention, and emergency response. This ensures that everyone is aware of the risks and knows how to handle allergic reactions. 3. Accurate Food Labelling: Ensure that all food items are clearly labelled with allergen information. This helps students and staff identify safe food options and avoid potential allergens. 4. Individual Healthcare Plans (IHPs): Develop Individual Healthcare Plans for students with food allergies. These plans should include details about the student's allergies, emergency contact information, and steps to take in case of an allergic reaction. 5. Allergy-Friendly Menus: Offer diverse menu options that cater to different dietary needs and allergies. This includes providing allergen-free alternatives and ensuring that meals are prepared in a way that prevents cross-contamination. 6. Communication with Parents: Maintain open communication with parents about their child's dietary needs and any changes to the menu. This helps ensure that parents are aware of what their child is eating and can provide any necessary updates. 7. Emergency Preparedness: Have emergency procedures in place, including access to epinephrine auto-injectors (e.g., EpiPens) and trained staff who can administer them. Regularly review and practice these procedures to ensure readiness. 	
Audit Findings		<p>At Allens Croft Nursery School, children enjoy their meals in two welcoming dining rooms. School meals are prepared off-site and delivered fresh each day. The nursery works closely with parents, carers, and the catering company to make sure every child's dietary needs are fully understood and met. Before children start, parents provide detailed information about any dietary requirements or medical needs, and this is carefully recorded. The Nursery Manager then organises this information so that all staff can easily access it and ensure consistency. Care plans are also in place for children with allergies to keep them safe during mealtimes.</p> <p>The dining environment is designed to be inclusive for all children. Food-serving points and eating areas are accessible for wheelchair users, and both dining tables and outdoor picnic tables are suitable for children who may need extra space or support. This thoughtful approach ensures that every child can enjoy mealtimes comfortably and safely alongside their friends.</p>
Grade 2026	Compliant	

Suggestions to improve/resolve	Maintain existing action and processes.
---------------------------------------	---

10.2.17	Social Spaces and Playgrounds
Best Practice	<p>Outdoor circulation needs to have a clear rationale and provide a variety of accessible routes to suit the whole spectrum of children, minimising gradients so that they can easily access all outdoor facilities.</p> <p>There should be shelter available along routes for more vulnerable children, with seats every 50m on long pedestrian routes, safe and easily navigable surfaces (wheelchair accessible), with safe changes in level or transitions between surfaces - both ramps and steps are needed where level access is absent.</p> <p>Good sightlines for overseeing children’s safety, with no hidden spaces, noisy busy routes separate from quieter sheltered spaces, so more vulnerable children can make their own way at their own pace, level thresholds for access by wheelchair users and to avoid staff lifting mobility equipment, wide enough gates and wide paths with defined edges, well away from outward opening windows and any hazards clearly identified.</p> <p>1200mm, preferably 1500mm and 1800mm for busy routes with passing places as required.</p> <p>Bays off circulation routes can be provided for children to sit and talk, rest, re-orientate or calm down and let others pass – but they need to allow clear sightlines and passive supervision, since hidden spaces can encourage inappropriate behaviour. There should be outdoor access for curriculum and social activities and for means of escape, but it should be controllable for safety and security, especially where there is a possibility that children might try to run out of school.</p> <p>It is important that all students can access and use the external spaces in a School, so that they can participate in social and recreational activities. Outdoor space in Schools normally comprises a mix of hard surfaced and grassed areas. While grass may be a difficult surface for wheelchair users, access to grassed pitches can be provided using pathways or matting products. As well as areas for activities such as games and sports, quieter social spaces with seating should also be provided for students to use. Where playgrounds are provided, equipment should be carefully selected to ensure accessibility for all students, including wheelchair users, students who use crutches and walking frames, and those with hearing loss or vision loss.</p> <p><u>Playgrounds</u></p> <p>Five percent of children in the UK are disabled and many of these find themselves excluded from outdoor play activities because school playgrounds are not designed with inclusion in mind.</p> <p>Outdoor play brings benefits of all kinds: it improves physical and mental health, promotes personal development and encourages better social interaction. However, some children are denied these opportunities because</p>

	<p>the design of the playground or the equipment on offer creates a barrier for them.</p> <p>Pupils who use a wheelchair, for example, may face accessibility issues whereas autistic pupils might find busy spaces overbearing. A truly inclusive playground would ensure that all pupils could participate in outdoor play.</p>	
<p>Audit Findings</p>		<p>At Allens Croft Nursery School, the outdoor areas are designed so that all children can enjoy them safely and confidently. The outdoor paths and play spaces are wheelchair accessible, ensuring that children who use mobility aids can move around freely. There is currently a temporary issue affecting access in the Big Garden, but this will be fully resolved during the Easter holiday period, ensuring children can continue to explore all areas without barriers.</p> <p>The nursery also provides outdoor seating areas that can be accessed easily by wheelchair users, allowing all children to rest, watch, or join in with friends. Play equipment is arranged so that children who use wheelchairs can get close to it and engage in play, helping them feel included in all outdoor activities.</p> <p>Understanding that some children may find the busyness of the playground overwhelming, the nursery offers quieter outdoor spaces where children can take a break, calm down, or enjoy some peaceful time. These areas give children the chance to regulate their emotions before rejoining their friends.</p> <p>Allens Croft Nursery School recognises that an inclusive playground should offer open, flexible spaces where children can play imaginatively together. Some areas are deliberately kept free of fixed equipment and are surfaced in a way that allows all children—including those with physical or sensory needs—to move around comfortably. At the same time, quieter corners provide a calming alternative for those who need a moment away from the noise and energy of busy play.</p>
<p>Grade 2026</p>	<p>Compliant</p>	
<p>Suggestions to improve/resolve</p>	<p>Maintain existing action and processes.</p>	

<p>10.2.18</p>	<p>Doors</p>
<p>Best Practice</p>	<p>According to AD M</p>

- Doors to have maximum opening force at leading edge of 20N. Door furniture to be easily operated by a closed fist, visually apparent i.e., contrasting with door surface and not cold to touch. Door clear width measured from handle to jamb. Varies according to angle of approach. Straight approach to door – 800mm clear width / right angle approach to door with access route min 1500mm - 800mm clear width / right angle approach to door with access route min 1200mm - 825mm clear width and doors and side panels to doors wider than 450mm to have vision panels provided – visibility zone between 500mm and 1500mm and if necessary interrupted between 800mm and 1150mm above floor level e.g., to accommodate an intermediate horizontal rail. Unobstructed 300mm min space on door pull side between door leading edge and wall (not to powered doors).
- Door frames to contrast with surrounding wall surfaces. Manifestation at two levels, 850mm to 1000mm and 1400mm to 1600mm. Glass doors in glass façade to have 150mm high contrast strip at door edges, and door protection if capable of being left open. Manifestations should visually contrast inside and out and in all lighting conditions. Fire doors self-closing either fitted with hold open devices or free swing devices and close on activation of the fire alarm (to negate requirement for 20N opening force)

According to BS 8300 - Colour and luminance contrast should be used to distinguish the boundaries of floors, walls, doors and ceilings, e.g., if the architrave is the same colour as the door but a different colour from the surrounding wall, it may outline the opening for some visually impaired users when the door is open.

There should be adequate space alongside the leading edge of the doors for a wheelchair user to pass through. A space of 300 mm should be provided alongside the leading edge of the door to enable wheelchair users to reach the handle. The Department of the Environment Part M Technical Guidance Document notes the importance of a 'leading edge' at every door. This is "an unobstructed space of at least 300mm between the leading edge of a single leaf door (when it opens towards you) and a return wall, unless the door is opened by remote automatic control. This enables a person in a wheelchair to reach and grip the door handle, then open the door without releasing hold on the handle and without the footrest colliding with the return wall".

Doors present some of the most common accessibility issues. They may be too "heavy" and require too much force to open. Heavy doors are especially difficult for people with disabilities and seniors with limited upper body strength and/or skills in using their hands. They may close too quickly for some people to pass through easily. People who move slowly or use mobility devices like wheelchairs or walkers may not be able to pass through fast enough. Luckily, these common problems can often be resolved by simply adjusting door closers.

Door controls should be at a suitable height. All door furniture and fittings to be 1000mm above floor level. Switches to be the large touch plate type. All of the door handles should be the D-shape variety. All door furniture and fittings to contrast to their background.

Audit Findings		<p>The school's doors meet accessibility standards, ensuring they can be used safely and independently by students, staff, and visitors with disabilities. All doors are wide enough to accommodate wheelchair access and are fitted with lever-style handles to support ease of use. In addition to accessibility requirements, the doors have also been designed to comply with fire safety regulations. This includes the installation of fire-resistant doors in required areas, clearly marked emergency exits, and ensuring that all evacuation routes remain unobstructed and easy to access.</p> <p>Routine maintenance takes place to ensure that all doors remain in good working condition. Hinges, locks, handles, and door closers are regularly inspected to prevent deterioration that could affect security, accessibility or fire safety. This proactive approach supports the long-term reliability and safety of the building's circulation routes.</p> <p>All doors within the school have the correct D-style handles, and none are fitted with noisy door closers. Doors used by disabled pupils are wide enough for wheelchair access, and vision panels extend low enough for young children and wheelchair users to see through and be seen. Door closers are set so that minimal force is required to open them, and door handles contrast clearly with their backgrounds to support visibility. Corridor doors, however, are not held open for ease of access, and therefore high-visibility edge markings are not applicable in this case.</p>
Grade 2026	Compliant	
Suggestions to improve/resolve	Maintain existing actions and processes.	

10.2.19	Teaching and Learning Spaces. Furniture and Teaching Equipment
Best Practice	<p>The classroom is the most common type of room in a school building.</p> <p>An appropriate classroom environment is important for successful teaching and learning and for ensuring that all students can participate equally in classroom activities. It is important that all students can circulate freely around the classroom, and can access storage areas, equipment, sinks, sockets, and so on.</p> <p>The provision of ample space and level access is important for those using assistive devices, such as wheelchairs, crutches or canes. Worktops and sinks should have knee space underneath to allow a wheelchair user to use them comfortably. Anti-glare film is recommended on windows in areas which</p>

visually impaired children use frequently. This is due to photosensitivity further reducing vision, ability to judge speed and distance and also causing eye pain and headaches.

Students with disabilities will have certain unique requirements that impact how they use School facilities. For example:

- Students with mobility disabilities may have particular difficulties with steps, or heavy doors. They may need additional desk space if they use a wheelchair, or additional storage space for a walking frame or crutches.
- Students with visual difficulties will benefit from improved lighting and clear visual contrasts on doorframes and support columns.
- Some students with emotional, psychological or mental health difficulties will benefit from a calming environment created by appropriate use of light and colour schemes.
- Many students have particular requirements for access to laptop computers or other assistive technology. Availability of power points for recharging will greatly benefit these students

At secondary level, children progress to a wider ranging and specialised curriculum, and accommodation can be correspondingly diverse. Rather than spending most of their day in one classroom as they do in primary school, children move around the school to spaces with specialist facilities for different activities. 14–19year olds often also have vocational training and work experience. Mainstream schools can be especially large, so some children with SEN and disabilities need assistance when they move between different spaces and to take part in school life.

The range of spaces needed will depend on a school's curriculum, size and organisation but will typically provide the following: - general teaching spaces, larger spaces for a range of practical specialist and performance subjects, small rooms for individual and group work, resource spaces, including library and ICT facilities, large spaces for physical education and assemblies, dining and social spaces, outdoor spaces.

These will be supported by: staff facilities, storage for personal belongings, learning aids and resources, accessible toilet and changing rooms, kitchen facilities

3 sizes of general teaching space schools are recommended: Small classrooms (49–56m² for up to 30 children) If many children have SEN and disabilities or need a high level of support, adjustments will need to be made to how a space of this size is used. For example, class numbers might need to be reduced to allow adequate circulation space for learning aids and teaching assistants. It is not generally recommended to have small general teaching spaces in new school buildings because of their lack of flexibility.

Standard classrooms (56–63 m² for up to 30 children) Standard teaching spaces are usually large enough for children with SEN and disabilities to access all relevant curricular activities, allowing for one child using mobility aids and a wheelchair, with access to some or all of the space, depending on the layout.

Large classrooms (63–70 m² for up to 30 children) Large teaching spaces are especially suitable for children with SEN and disabilities, since they provide

	<p>enough room to accommodate one or more children (or staff) using mobility aids and/or wheelchairs, as well as the necessary support staff.</p> <p>Furniture layouts in the classrooms should be carefully planned to ensure space at the entrance and access to key facilities such as the whiteboard, storage areas, and practical zones. An 1800mm turning space at these areas should be maintained and a preferred circulation width of 1200mm for movement between them. A minimum of 900mm circulation width should be available on all routes. This space is based on the requirements of wheelchair users but will also benefit a range of other users.</p> <p>Chairs with arms and height adjustable workbenches should be available</p> <p>As of September 2012, the Equality Act 2010 (“the Act”) imposed a new duty on schools to make reasonable adjustments to provide auxiliary aids and services to disabled pupils.</p> <p>Examples of auxiliary aids might include hearing loops, adapted PE equipment, adapted keyboards and special software. Cost will inevitably play a major part in determining what is reasonable and it is more likely to be reasonable for a school with substantial financial resources to make an adjustment entailing significant cost. Even so, many reasonable adjustments are inexpensive, involving a change in practice rather than the provision of expensive pieces of equipment or additional staff.</p>
<p>Audit Findings</p>	<div data-bbox="443 994 676 2024" data-label="Image"> </div> <p>At Allens Croft Nursery School, the classroom spaces are carefully arranged to make sure all children can move around safely and independently. The layout at each entrance and around key areas—such as where resources are stored or where activities take place—is planned so that there is plenty of space for children who may need extra room, including those who use mobility aids or wheelchairs. These wider spaces also help many other children who may need more support with physical movement or spatial awareness.</p> <p>All resources are stored in places that children can easily reach, ensuring that no child is prevented from accessing the equipment they need. Displays around the classroom are positioned so that all children can enjoy and learn from them, including those who may view them from a lower height or seated position.</p> <p>The school also provides appropriate furniture and equipment to meet the needs of individual children. This is reviewed on a case-by-case basis so that every child has what they need to feel comfortable and included. Where specialist furniture is required, the nursery ensures that it is properly adjusted, well maintained, and safe to use. The overall room layout supports easy movement and helps create a</p>

		<p>calm, accessible environment where all children can take part fully in nursery life.</p>
<p>Grade 2026</p>	<p>Compliant</p>	
<p>Suggestions to improve/resolve</p>	<p>Maintain existing action and processes.</p>	

<p>10.2.20</p>	<p>Staff Facilities</p>
<p>Best Practice</p>	<p>With respect to teachers, school facilities affect teacher recruitment, retention, commitment, and effort. With respect to students, school facilities affect health, behaviour, engagement, learning, and growth in achievement.</p> <p>Opinions on staff room design vary widely from school to school. In some schools, these spaces are used successfully by teachers for collaboration and knowledge sharing. In other schools, the staff room is avoided at all costs or has even been removed altogether and replaced with mixed student and staff breakout spaces.</p> <p>We believe that the staff room is often the most neglected room in the school. Many schools are so focussed on attracting the top students and keeping their grounds looking immaculate, but when it comes to the staff room – the engine room of the entire school – it is a different story.</p> <p>Does your staff room design itself leave anything to be desired? Are there tea stains on the carpet, seating that has seen better days or overstuffed pigeon-holes? Are there out-dated staff notices or overflowing bins? Your staffroom should be, in a certain sense, a haven for your staff. A place where they can meet to recharge, socialise with colleagues and obtain advice and support. Whilst a staff room etiquette may be necessary, we believe that creating an inspirational staff base could make a world of difference to your school.</p> <p>Head teachers should ask themselves these 3 very important questions:</p> <ol style="list-style-type: none"> 1. Would you be happy to show your staff room to prospective parents of the school? 2. Do you enjoy using your staff room? 3. Is the furniture and decor fit for purpose? <p>The staff room is no longer just a place to spend their lunch hour. It is a place to work undistracted by students, an escape away from noisy corridors, a change of scene, a break-out area, a library to store important documents, and a place to conduct meetings. Staff rooms boost the morale of teachers. This communal area is where teachers can connect with one another. A reminder that working in a school is a team effort. Teachers need that network, and this support reflects positivity onto the students, improving results all around. Teachers are under constant scrutiny. From peers, superiors, parents and Ofsted.</p>

	Staff rooms are important for members of staff and can boost morale, as well as giving them a place to call their own. Making members of staff feel like they belong and are supported reflects onto the students also.	
Audit Findings		<p>There is a Staffroom in the school building for staff to use.</p> <p>The school recognises that everyone needs 'timeout' and acknowledge that their staffroom is extremely important for their employees. The school staffroom is there for teaching staff to relax, re-energise and socialise with their colleagues in between lessons.</p> <p>Having their own break out area as the space to take time out from the hectic school day can help to keep morale high. The staffroom acts as the perfect place for members of staff to take a well-deserved break (just like the pupils do) and informally socialise with other teachers too.</p> <ul style="list-style-type: none"> • Is the staffroom wheelchair accessible? Yes • Is there space for a wheelchair to manoeuvre safely? Yes • Are there high-backed seats with arms in the staffroom? No <p>There are currently no chairs with arms in the staff rooms. It is important to have chairs with arms available in staff rooms as people with mobility issues would find it easier to use them.</p>
Grade 2026	Improvement Recommended	
Suggestions to improve/resolve	Provide at least one high backed chair in the staff room.	

10.3. Access to Education

An accessible school is one in which disabled pupils and pupils with ongoing or temporary medical limitations can participate fully in the school curriculum.

The curriculum covers teaching and learning and wider provision embracing after-school clubs; leisure, sporting and cultural activities; and school trips. Planning for improved access to the curriculum should include consideration of school and classroom organisation and support, timetabling, curriculum options, the deployment of staff and staff information and training.

Pupils with disabilities, medical or intellectual capacity needs can be amongst the most vulnerable in society. Safeguarding the wellbeing of these pupils especially is therefore an important consideration.

10.3.1	Staff Expertise and Training, including Disability Awareness Training
---------------	--

<p>Best Practice</p>	<p><u>Staff Expertise and Training</u></p> <p>Teachers, Teaching Assistants (TAs), and adult helpers all have a specific job to do in the classroom and each role requires careful planning. The effective use and management of classroom TAs, specifically, also requires a coordinated approach to that planning.</p> <p>Provision for pupils with SEND should be included in a school’s regular monitoring of the quality of teaching. This helps to identify priorities for their ongoing programme of staff professional development and training and ensures that all teachers and support staff have appropriate skills and knowledge to support provision for children with additional needs.</p> <p>A school’s SENCO should actively engage in a range of opportunities to share best practice and keep abreast of current local and national initiatives and policies to support pupils with additional needs.</p> <p>The school should also be able to seek advice and guidance from relevant agencies to support staff to evaluate and develop provision for pupils who have the most complex needs. Considerable thought, planning and preparation should go into utilising a school’s resources to ensure children achieve the best outcomes, gain independence and are prepared for adulthood from the earliest possible age.</p> <p>Schools should be committed to developing the on-going expertise of all of their staff. Ideal additional training a school could offer to their staff includes (but is not limited to):</p> <ul style="list-style-type: none"> • Autism and Social Communication difficulties • Dyslexia (specific literacy difficulties) • Catch-up Maths programmes • Speech and Language development • Language Development and Acquisition • Medical Needs and Conditions • Learning Mentor support for the wellbeing and positive mental health of vulnerable pupils • Mentors trained to use Restorative Approaches to manage conflict • Wellbeing Practitioners to support emotional needs and mental health issues • Emotional Literacy Support Assistant (ELSA) <p>Continuing Professional Development opportunities should be offered to all staff to continue their training.</p> <p>Specific training should be made available to staff to support the needs of a particular child(ren) if the expertise is not already in school.</p> <p><u>General Disability Awareness Training for Staff, Pupils and Governors</u></p> <p>Disability Awareness Training is an essential tool that every school should offer to their staff, Governors, and pupils. The purpose of this training is to provide education and support to better understand the challenges that individuals with disabilities face in their daily lives.</p>
-----------------------------	--

	<p>The training focuses on increasing awareness of the different types of disabilities such as physical, sensory, cognitive, and mental health disabilities. It also highlights the challenges faced by individuals with these disabilities, such as accessibility in the classroom, social inclusion, and communication barriers.</p> <p><i>For Staff and Governors</i>, the training provides insight into how to create accommodation plans, provide support and assistance in the classroom, and encourage equal opportunities for all students. It also helps to ensure that the school environment is accessible to everyone, with appropriate adjustments made for students with disabilities. This can include accessible facilities, technology and equipment, and specialist support from outside agencies.</p> <p><i>For Pupils</i>, Disability Awareness Training helps to promote empathy and understanding of others, create a positive attitude towards people with disabilities, and encourage an inclusive learning environment. This training can greatly benefit all students, not just those with disabilities. It helps to promote respect for everyone’s abilities, and that everyone has the right to an equal education and opportunities.</p>
<p>Audit Findings</p>	<p>The school supports all staff to continue learning, alongside their students. They are committed to:</p> <ul style="list-style-type: none"> • Providing the time, resources, choice and autonomy to allow effective, personalised, professional development - within a supportive whole school structure • Developing a coaching culture, with an emphasis on deep reflection, listening for understanding and personalised support • Providing a wide range of professional development opportunities • They also offer training opportunities for their non-teaching staff to support their development and career aspirations. <p>Continuing Professional Development opportunities are offered to all staff to develop their expertise.</p> <p><u>Disability Awareness Training</u></p> <p>Doe the school offer Disability Awareness Training? Yes</p> <p>A school should offer Disability Awareness Training to cultivate an environment where every student, staff member, and parent feels respected, understood, and included. This training helps dismantle stereotypes and unconscious biases that can lead to exclusion or marginalisation, replacing them with empathy, informed understanding, and practical strategies for inclusion. By educating staff and students about the diverse experiences of disabled individuals—including physical, sensory, cognitive, and hidden disabilities—schools foster a culture of dignity and belonging that goes beyond compliance and into meaningful change.</p> <p>For staff, Disability Awareness Training enhances their ability to make reasonable adjustments, communicate effectively, and support pupils with a wide range of needs. It equips them to recognise barriers that may not be immediately visible and respond with sensitivity and confidence. This is especially important in classrooms, where inclusive teaching practices can significantly impact a child’s academic progress and emotional wellbeing. For students, the training promotes peer empathy, reduces bullying, and</p>

	encourages collaborative learning, helping all children to thrive in a diverse community.
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing actions and processes.

10.3.2	Admission
Best Practice	<p>All schools have admission criteria to decide which children get places. The school or local council usually set these.</p> <p>Admission criteria are different for each school. For example, schools may give priority to children:</p> <ul style="list-style-type: none"> • who have a brother or sister at the school already? • who live close to the school? • from a particular religion (for faith schools) • who do well in an entrance exam (for selective schools, for example grammar schools or stage schools)? • who went to a particular primary school (a 'feeder school') • in care or being looked after (all schools must have this as a top priority) • who are eligible for the pupil premium? • If a child has SEN their EHCP or education, health and care plan will recommend a school for them. If a parent applies there, the school must give that child a place. <p>Children and young people with SEN can become particularly anxious about 'moving on', whether this be joining a new school or moving between classes or even leaving the school.</p> <p>A school should be conscious to support a child's wellbeing and positive mental health through successful transition and ensure consistency of support:</p> <p><u>When joining Nursery/Reception Classes:</u></p> <p>The Early Years Leader or SENCO should contact the pre-school setting to seek information regarding the nature and level of needs for pupils identified with SEND and the provision that has already been offered to overcome these barriers. Discussions should be held with parents/carers to share information.</p> <p>If the pupil has more significant needs and /or has support from other professional agencies, more formal transition meetings should be arranged and documented.</p> <p><u>When moving to/from another school:</u></p> <p>The school should contact the receiving school SENCO and share information about special arrangements and support currently in place to help your child achieve their learning goals. They should ensure that all records are passed between schools as soon as possible.</p> <p><u>When moving between classes and phases:</u></p>

	<p>An information sharing meeting should take place with the new teacher.</p> <p>Opportunities should be provided for a child to visit the new class and meet the teacher and other key staff. The school should encourage the involvement of parents/carers in this process as it is critical to supporting a successful move.</p> <p>For those pupils with a higher level of need, a multi-agency 'Action for Inclusion' meeting may be required.</p>
Audit Findings	<p>Allens Croft Nursery School warmly welcomes all children and families, valuing every application regardless of race, nationality, ethnicity, religion, disability, or previous educational background. Every child is treated equally, and the nursery takes its responsibilities under the Special Educational Needs and Disability Act and the Equality Act very seriously. When a child may need additional support, the school ensures that any extra meetings, visits, or transition arrangements are put in place to help them settle confidently.</p> <p>The nursery understands that starting a new setting can feel overwhelming, especially for children with SEND. For this reason, staff work closely with families from the very beginning. Children with potential additional needs are identified during the application process, and a supportive transition plan is created. Where possible, the nursery offers stay and play sessions for up to six weeks before a child starts, helping them become familiar with the environment and staff.</p> <p>Communication with families is enhanced before admission and may include multi-agency meetings or home visits so staff can gain a full understanding of the child's needs. The SENCO, together with parents, previous settings, and external professionals, discusses any existing reports or recommendations to ensure that the right support is ready from the moment the child joins. A tailored plan outlining any additional provision is created jointly by the SENCO and the child's new class teacher.</p> <p>At Allens Croft Nursery School, every child is recognised and supported as an individual. No child is ever denied a place because of their needs, background, or abilities. When a child requires specific adjustments—for example, wheelchair access—the Governing Body and SENCO work closely with the family to make sure their needs are fully met. The school's commitment to inclusion ensures that all children are welcomed, supported, and given the very best start in their early education.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.3	SEN Information Report
Best Practice	The SEN information report is a document that outlines the school's approach to supporting children with SEN and disabilities, and it should be accessible to parents on the school's website. <i>Please note that independent schools are not required to publish their SEN Information Report on their website*.</i>

	<p>It is a critical tool that provides essential information to parents about how the school identifies, assesses and meets the needs of SEN pupils.</p> <p>The SEN Information Report should include details on the school's SEN policy, including its objectives in relation to SEN, how it identifies and assesses SEN and its approach to teaching SEN pupils. It should also include details on how the school monitors and reviews the progress of children with SEN and how it supports children's social and emotional well-being.</p> <p>The SEN Information Report should contain everything OFSTED – and for that matter any agency, parent, student or professional – could want to know in terms of SEN identification, provision and support. It can also act as a guide through SEN provision for all members of staff, whatever their career profile. It must include:</p> <ul style="list-style-type: none"> • Details of and links to your area Local Offer(s). Remember that if you work with more than one local authority, then you need to have links to all of the Local Offers for those authorities. • In relation to mainstream schools and maintained nursery schools, the name and contact details of the SENCO. Best practice would be to also include the same details for your headteacher and your SEND governor, as well as how parents can make a complaint or raise a concern. • Information about the expertise and training of staff in relation to children and young people with SEN and about how specialist expertise will be secured. • How you make provision for pupils with SEN, whether or not they have Education, Health and Care Plans (EHCPs). • What interventions you have implemented and their impact. • The additional learning opportunities for pupils with SEN. • Your procedures, if you are a mainstream school or nursery, for the identification and assessment of pupils with SEN. • Your approach to teaching pupils who have SEN. • How you adapt the curriculum and the learning environment for those who have SEN. • How the school enables pupils with SEN to engage in the activities of the school (including physical activities) together with children who do not have SEN. • Details of the support that is available for improving the social, emotional and mental health and development of pupils with SEN. • How you involve pupils and their parents in decision-making. • How you evaluate the effectiveness of your provision, including securing feedback and the views of pupils and their parents
Audit Findings	<p>The school's SEN Information Report is clearly available on the school's website.</p> <p>They understand that having access to this information is vital since it provides parents with insight into how they teach SEN pupils. They also understand that this report helps to answer any questions or concerns parents may have, and it helps them to make informed decisions about their child's education. It also</p>

	<p>enables parents to work closely with teachers and support their child's learning and development.</p> <p>Parents need to know that the school is committed to providing their SEN child with the right support, and the SEN Information Report achieves precisely that. The school is committed to ensuring transparent communication between teachers and parents and fosters a positive relationship that supports the child's education and well-being.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.4	Safeguarding
Best Practice	<p>Disabled and impaired children and young people can be amongst the most vulnerable and may be especially reliant upon the support of adults. Such groups are potentially vulnerable to being targeted inappropriately. Effective safeguarding systems are vitally important for the protection of such pupils.</p> <p>The DfE publishes Statutory guidance for schools and colleges on safeguarding children and safer recruitment. The guidance is updated from time to time.</p> <p>Statutory guidance sets out what schools must do to comply with the law. You should follow the guidance unless you have a very good reason not to.</p> <p>https://www.gov.uk/government/publications/keeping-children-safe-in-education--2</p>
Audit Findings	<p>The Designated Safeguarding Lead (DSL) at Allens Croft Nursery School is David Aldworth, who oversees all safeguarding procedures across the setting. He is supported by a strong safeguarding team made up of Stephanie Wheatcroft, Amanda Smith, Sarah Roberts, Jason Lee, Claire Thorns, Julie McCarthy, and Maggie Penny, all of whom serve as Deputy Designated Safeguarding Leads. This team works together to ensure that the safety and wellbeing of every child remains the school's highest priority.</p> <p>Allens Croft Nursery School recognises that children with Special Educational Needs and Disabilities (SEND), or those with certain health conditions, may face additional safeguarding challenges. These children may have greater difficulty recognising or reporting abuse, or may experience barriers in communication. Staff understand these vulnerabilities and are committed to ensuring that children with SEND receive the support they need to express themselves and feel heard.</p> <p>The school takes a proactive approach to helping all children communicate their thoughts, feelings, and worries. Children with SEND are provided with appropriate strategies, tools, and adult support to help them share their voice in a way that feels safe and accessible. Their views are always taken seriously, and any concerns raised are acted upon promptly and sensitively. This commitment ensures that every child at Allens Croft Nursery School feels protected, valued, and listened to.</p>

	<p>Members of staff are encouraged to be aware that children with SEND can be disproportionately impacted by safeguarding concerns, such as exploitation, peer group isolation or bullying including prejudice-based bullying. To address these additional challenges, Allens Croft Nursery School will always consider implementing extra pastoral support and attention for children with SEND.</p> <p>Allens Croft Nursery School fully recognises the contribution it can make to protect children from harm and to support and promote the welfare of all children who are registered pupils at the school. Safeguarding is taken very seriously, and they understand that no single professional can have a full picture of a child's needs and circumstances. If children and families are to receive the right help at the right time, everyone who comes into contact with them has a role to play in identifying concerns, sharing information and taking prompt action.</p> <p>All visitors complete a signing in/out form, wear a school ID badge and are provided with key safeguarding information including the contact details of safeguarding personnel in school. Scheduled visitors in a professional role (e.g., fire officer) are asked to provide evidence of their role and employment details (usually an identity badge) upon arrival at school. If the visit is unscheduled and the visitor is unknown to the school, the school will contact the relevant organisation to verify the individual's identity, if necessary.</p> <p>All staff at the school have been provided with, read, and signed to acknowledge, the current edition of DfE "Keeping Children Safe in Education".</p> <p>The school has a safe and secure building and grounds; they carry out daily, weekly or yearly risk assessments for the equipment and areas used by all children, both in the school grounds and whenever they go for trips beyond their boundaries.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.5	Pupils with physical Health Care Needs
Best Practice	<p>Section 100 of the Children and Families Act 2014 places a duty on governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school with medical conditions.</p> <p>Pupils at school with medical conditions should be properly supported so that they have full access to education, including school trips and physical education. Governing bodies must ensure that arrangements are in place in schools to support pupils at school with medical conditions. Governing bodies should ensure that school leaders consult health and social care professionals, pupils and parents to ensure that the needs of children with medical conditions are effectively supported.</p> <p>Parents of children with medical conditions are often concerned that their child's health will deteriorate when they attend school. This is because pupils with long-term and complex medical conditions may require on-going support,</p>

	<p>medicines or care while at school to help them manage their condition and keep them well. Others may require monitoring and interventions in emergency circumstances.</p> <p>It is also the case that children’s health needs may change over time, in ways that cannot always be predicted, sometimes resulting in extended absences. It is therefore important that parents feel confident that schools will provide effective support for their child’s medical condition and that pupils feel safe. In making decisions about the support, they provide; schools should establish relationships with relevant local health services to help them. It is crucial that schools receive and fully consider advice from healthcare professionals and listen to and value the views of parents and pupils.</p> <p>In addition to the educational impacts, there are social and emotional implications associated with medical conditions. Children may be self-conscious about their condition, and some may be bullied or develop emotional disorders such as anxiety or depression around their medical condition. In particular, long-term absences due to health problems affect children’s educational attainment, impact on their ability to integrate with their peers and affect their general wellbeing and emotional health. Reintegration back into school should be properly supported so that children with medical conditions fully engage with learning and do not fall behind when they are unable to attend.</p> <p>Short term and frequent absences, including those for appointments connected with a pupil’s medical condition, (which can often be lengthy), also need to be effectively managed and appropriate support put in place to limit the impact on the child’s educational attainment and emotional and general wellbeing.</p> <p>Some children with medical conditions may be disabled. Where this is the case governing bodies must comply with their duties under the Equality Act 2010. Some may also have special educational needs (SEN) and may have an EHCP, or Education, Health and Care (EHC) plan which brings together health and social care needs, as well.</p> <p>Ofsted - their inspection framework places a clear emphasis on meeting the needs of disabled children and pupils with SEN and considering the quality of teaching and the progress made by these pupils. Inspectors are already briefed to consider the needs of pupils with chronic or long-term medical conditions alongside these groups and to report on how well their needs are being met. Schools are expected to have a policy dealing with medical needs and to be able to demonstrate that this is implemented effectively.</p>
<p>Audit Findings</p>	<p>Allens Croft Nursery School does all they can to ensure that all pupils with specific needs are supported. The school considers the child as a whole and recognises that some factors that have an impact on a child’s progress are not always due to SEN.</p> <p>The school’s policy clearly identifies the roles and responsibilities of all those involved in the arrangements they make to support pupils at school with medical conditions. The school ensures that sufficient staff have received suitable training and are competent before they take on responsibility to support children with medical conditions. They also ensure that any members</p>

	<p>of school staff who provide support to pupils with medical conditions are able to access information and other teaching support materials as needed.</p> <p>The school has accessibility and educational support arrangements in place for pupils with temporary medical or physical impairments such as broken limbs, post-operative recovery periods.</p> <p>Some children with medical conditions may be disabled and where this is the case the school will comply with its duties under the Equality Act 2010. Some may also have special educational needs (SEN) and may have an EHCP, or Education, Health and Care (EHC) plan which brings together health and social care needs, as well as their special educational provision and the SEND Code of practice (2014) is followed. If a care plan is needed, this will be written by the attached school nurse or medical specialist involved. The care plan will be shared with all key adults in school and a copy kept in the medical room for reference.</p> <p>Allens Croft Nursery School always considers what reasonable adjustments they might make to enable children with medical needs to participate fully and safely on visits. They carry out a risk assessment so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions are included. They consult with parents and pupils and advice from the relevant healthcare professional to ensure that their pupils can participate safely.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.6	Access to the Curriculum and Lesson Planning for pupils with SEN
Best Practice	<p>Ensuring access to the curriculum is vital in providing equal opportunities to children and young people with SEND. Considerable progress has been made to improve the accessibility of the curriculum, covering both teaching and learning, as well as Early Years, trips and visits, after school activities and extended school activities in our schools.</p> <p>Schools and educational settings (including Early Years) are responsible for providing a broad and balanced curriculum for all pupils and play a key role in planning to increase access to the curriculum for all pupils. Therefore, schools are required to have in place an 'Accessibility Plan' that demonstrates what actions the school is taking to increase access to the curriculum, particularly for those pupils with SEND.</p> <p>Adjustments that would help children with disabilities have better access to the curriculum might include:</p> <ul style="list-style-type: none"> • changes to teaching and learning arrangements, classroom organisation and timetabling. • Technology suited to a child's needs can help them learn faster and more easily. This can increase their access to the curriculum. Examples of technology that can help include:

	<ul style="list-style-type: none"> • touch-screen computers, joysticks and trackerballs, easy-to-use keyboards, interactive whiteboards, text-to-speech software, Braille-translation software, software that connects words with pictures or symbols. <p>The following is considered good practice:</p> <ul style="list-style-type: none"> • Develop effective classroom partnerships by differentiating the learning objectives and outcomes, ensuring all staff are fully briefed and can adjust the lesson to meet the needs of individual pupils. This partnership should be underpinned by encouraging independence amongst pupils. • Develop a whole school approach that raises the capability of all school staff to assist in the teaching of pupils with SEND in mainstream settings. In particular this approach should focus on ensuring school staff can provide care and support for vulnerable pupils and know who to speak to find out more. • Make SEND a priority by ensuring there is a member of the governing body, or a sub-committee, with specific oversight arrangements for SEN and disability. This should include regular reviews between the Headteacher, SENCO and the governing body on how resources are being allocated and the impact of this allocation.
<p>Audit Findings</p>	<p>Disabled pupils can participate in all curriculum areas at Allens Croft Nursery School.</p> <p>It is the Policy of the School that any pupil with any type of special need should be as fully integrated into the school as possible. They will have full access to the curriculum unless special arrangements have been made, in full consultation with all concerned. It is recognised that all pupils have something to offer to the school and that pupils have strengths and weaknesses in different areas. It is their policy to recognise those areas of strength and to enhance them, exploiting them to the full, thereby building a feeling of worth and self-esteem in each pupil. Concurrently, areas of challenge are targeted, in order to remedy problems.</p> <p>Access to the Curriculum:</p> <p>At Allens Croft Nursery School, staff are deeply committed to ensuring that every child, including those with Special Educational Needs and Disabilities (SEND), can access all areas of the curriculum. The nursery begins by carefully identifying and assessing the individual needs of each child. This helps staff understand how best to support them in the early years environment, where learning is rooted in play, exploration, and positive relationships.</p> <p>Individualised support plans are put in place for children with SEND to make sure they can fully participate in the nursery curriculum. These plans outline the specific support each child needs and are created in partnership with parents and carers. External professionals also contribute to these plans, helping the nursery gain a full understanding of each child’s strengths and challenges. The school regularly works with a wide range of specialists, including Educational Psychologists, the Communication and Autism Team, Language and Learning Support, Speech and Language Therapists, Occupational Therapists, Physiotherapists, Sensory Support teams, Physical</p>

	<p>Support Services, Dieticians, Community Paediatricians, and Health Visitors. Their combined expertise helps ensure that every child receives the most appropriate support.</p> <p>Children with SEND are included in all aspects of nursery life. Whether it is classroom learning, outdoor play, celebrations, or wider nursery activities, staff ensure that every child feels a sense of belonging and can participate meaningfully. Parents and carers are actively involved throughout planning and monitoring. They work closely with staff to review progress, share insights from home, and celebrate achievements together.</p> <p>This strong partnership between the nursery, families, and external professionals creates a supportive, inclusive environment where all children are able to learn, grow, and thrive.</p> <p>Lesson Planning:</p> <p>At Allens Croft Nursery School, staff carefully plan learning experiences to ensure that every child, including those with Special Educational Needs and Disabilities (SEND), can take part fully and successfully. Teachers differentiate activities, resources, and interactions so that the curriculum is accessible to children with a wide range of developmental needs. This thoughtful approach helps all children engage in play-based learning in a way that feels meaningful and achievable.</p> <p>The nursery regularly monitors and evaluates how well lesson planning is meeting the needs of children with SEND. Staff track progress and achievements through ongoing observation, assessments, and reflective discussions, and this information is shared with parents and carers so they feel informed and involved. Listening to children’s responses—both verbal and non-verbal—is also an important part of the process, helping staff understand how children are experiencing activities and what adjustments may be beneficial.</p> <p>Teachers have access to a range of resources and support to help them plan effectively for children with SEND. This includes guidance from the SENCO, shared strategies among staff, and resources designed to support communication, sensory needs, and early learning skills. By combining careful planning, ongoing assessment, and strong communication, Allens Croft Nursery School ensures that every child receives the support they need to learn, grow, and thrive.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.7	Access to assignments and examinations for pupils with SEND
Best Practice	Recent legislation and guidance make clear that all the teaching staff in a school are responsible for the provision for pupils with SEN and/or disabilities. All staff should be involved in developing school policies and fully aware of the

	<p>school's procedures for identifying, assessing and making provision for pupils with SEN and/or disabilities.</p> <p>Staff should help pupils with SEN to overcome any barriers to participating and learning, and make any reasonable adjustments needed to include disabled pupils in all aspects of school life. The Equality Act has substantial implications for everyone involved in planning and teaching the curriculum. Schools have specific duties under the Act to: make reasonable adjustments to their policies and practice to prevent discrimination against" disabled pupils increase access for disabled pupils, including access to the curriculum, through accessibility" planning, and promote disability equality and have a disability equality scheme showing how they will do so.</p> <p>Teachers have a statutory duty to modify the programmes of study "Schools have a responsibility to provide a broad and balanced curriculum for all pupils." This is more than just giving pupils 'access to the curriculum'.</p> <p>The curriculum is not immovable, like some building, to which pupils with SEN and/or disabilities have to gain access. It is there to be changed, where necessary, to include all pupils.</p> <p>The statutory 'inclusion statement' in the National Curriculum sets out a framework for modifying the curriculum to include all pupils. Teachers have to: set suitable learning challenges " respond to pupils' diverse learning needs, and "overcome potential barriers to learning and assessment for particular individuals and groups " of pupils.</p> <p>These principles allow you to: choose objectives for pupils with SEN and/or disabilities that are different from those of the rest "<i>of the group or modify the curriculum to remove barriers so all pupils meet the same objectives.</i>" Planning for pupils with SEN and/or disabilities should be part of the planning that you do for all pupils, rather than a separate activity. It doesn't need to be complicated or time-consuming.</p> <p>You can simply jot down brief notes in your lesson plans on the learning objectives and approaches you will use to remove barriers for pupils with SEN and/or disabilities. Any personal targets the pupil has can inform this planning.</p> <p>At times it may be appropriate to plan smaller steps to achieve the learning goal or provide additional resources. It is often possible to use the support available to do this, either from the SENCO or teaching assistant/mentor.</p> <p>You should also think about the questions you will ask different groups and individuals and the ways you will check that pupils understand. Some pupils with SEN and/or disabilities will show they understand in different ways from their peers, so you should look at a range of opportunities for pupils to demonstrate what they know and can do.</p>
<p>Audit Findings</p>	<p>Allens Croft Nursery School is committed to providing an inclusive, nurturing, and supportive environment for all children, including those with Special Educational Needs and Disabilities (SEND). Staff work thoughtfully to ensure that every child can access the curriculum in a way that is developmentally appropriate and meaningful. Teaching methods and learning materials are adapted to meet each child's individual needs, allowing all children to participate fully in daily nursery activities.</p>

	<p>The school also makes necessary adjustments to the physical environment to help children with SEND feel safe, comfortable, and ready to learn. Although formal examinations are not typically part of nursery life, the same principles apply—children may be given extra support, quiet spaces, or rest breaks when needed to help them engage successfully in learning experiences.</p> <p>Assistive technologies are used where appropriate to help children access activities more independently. These may include simplified digital tools, early communication supports, or emerging accessibility features that align with a child’s developmental needs. Individual Education Plans (IEPs) are created for children who require additional support. These plans are co-produced with parents and reviewed every three to four months, ensuring they evolve as the child grows. External professionals, such as educational psychologists, speech and language therapists, and occupational therapists, also contribute to a child’s support plan when needed.</p> <p>Staff receive ongoing training in inclusive practice so they can respond confidently to a wide range of needs within the nursery environment. They are made fully aware of each child’s unique profile and work collaboratively to provide consistent and effective support. Strong communication with parents and carers is a central part of the school’s approach. Families are actively involved in planning and decision-making through regular meetings, reviews, transition discussions, and person-centred approaches. This close partnership ensures that support at nursery aligns with what is happening at home, helping each child to feel secure, understood, and well supported.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.8	Access to Educational Visits and Extra Curricular Activities
Best Practice	<p>Ensuring accessibility of any activities or events that involve travelling outside School grounds will help all students to participate fully in School life. This would include educational trips, such as, visits to museums or theatres, visits to other Schools, sports events, or work experience. It is also important to review the accessibility of the destination, and the transport to and from the destination, as part of the planning of any such activities.</p> <p>If a visit is to cater for pupils with special needs, a suitable venue should be selected.</p> <p>Additional safety measures to those already in place in the school may be necessary to support pupils with medical needs during visits.</p> <p>All teachers supervising visits should be aware of a pupil’s medical needs and any medical emergency procedures.</p> <p>Summary sheets held by all teachers, containing details of each pupil’s needs and any other relevant information provided by parents, is one way of achieving this. If appropriate, a volunteer teacher should be trained in</p>

	<p>administering medication, if they have not already been so trained, and should take responsibility in a medical emergency.</p> <p>If the pupil's safety cannot be guaranteed, it may be appropriate to ask the parent or a care assistant to accompany a particular pupil.</p> <p>If teachers are concerned about whether they can provide for a pupil's safety or the safety of other pupils on a trip because of a medical condition, they should seek general medical advice from the School Health Service or further information from the pupil's parents. (For further DfE guidance see Supporting Pupils with Medical Needs: A Good Practice Guide)</p> <p>Schools will already be familiar with the nature of a pupil's special educational needs. Any limitations or problems the pupil may have should be taken into account at the planning stage and when carrying out the risk assessment. Off-site visits may pose additional difficulties for a pupil with SEN and the behaviour of some pupils may prove challenging.</p> <p>Enquiries should be made at an early stage about access and facilities for securing wheelchairs on transport and at residential centres etc., if appropriate. If ramps are not going to be available in certain places, the organiser may wish to arrange to take portable ramps with them. The group leader should at an early stage assess whether manual handling skills will be needed and, if so, whether training should be sought.</p>
<p>Audit Findings</p>	<p>At Allens Croft Nursery School, staff believe that even the youngest children benefit from experiencing the world beyond the nursery classroom. Trips, outdoor learning opportunities, and special activities are seen as an important part of each child's early development, helping them grow in confidence, curiosity, and independence. All activities and trips are planned with inclusion at the heart, and every outing is open to all children.</p> <p>When planning a visit or special activity, staff carefully consider the needs of every child, including those with Special Educational Needs and Disabilities (SEND). They work closely with parents and carers to understand what support or adjustments may be required, especially if the activity involves a longer day or a residential element. This partnership approach ensures that families feel reassured and children feel safe, prepared, and excited to take part.</p> <p>The nursery has clear policies and systems in place to make sure that children with SEND are fully included in all co-curricular activities and trips. Staff take time to assess individual needs and preferences, and they provide any necessary accommodations so children can participate meaningfully and joyfully. All staff members involved in trips and additional activities receive appropriate training so they feel confident supporting children with a range of needs.</p> <p>To help SEN children feel fully engaged, the nursery uses a variety of strategies—such as visual supports, small-group preparation, or pre-visit photos—to build confidence and ensure each child knows what to expect. Regular communication with parents and carers ensures that everyone feels informed, included, and able to support the experience from home.</p> <p>The school also reflects on each trip or activity afterwards, monitoring how well their inclusion strategies worked and identifying any improvements</p>

	needed. This reflective approach helps ensure that every child continues to experience the fun, learning, and sense of belonging that co-curricular activities and school trips can offer.

10.3.9	Outcomes
Best Practice	<p>Best practices for ensuring positive outcomes for children with Special Educational Needs and Disabilities (SEND) focus on creating an inclusive, supportive, and personalised learning environment.</p> <p>Here are some key strategies:</p> <ul style="list-style-type: none"> • Individualised Support Plans: Develop personalised education plans (IEPs) that cater to the unique needs of each child with SEND. These plans should outline specific goals, accommodations, and support services. • High-Quality Teaching: Ensure that teachers are well-trained in inclusive teaching practices and have access to resources that help them meet the diverse needs of their students. • Early Intervention: Identify and address the needs of children with SEND as early as possible to provide timely support and prevent potential learning difficulties from escalating. • Collaborative Approach: Involve parents, carers, and external professionals (e.g., speech therapists, occupational therapists) in the planning and implementation of support strategies. • Positive Relationships: Foster positive relationships between staff and students to create a supportive and inclusive school environment. • Focus on Strengths: Highlight and build on the strengths and abilities of children with SEND to boost their confidence and independence. • Regular Monitoring and Evaluation: Continuously monitor and evaluate the progress of children with SEND to ensure that the support provided is effective and adjust plans as needed. • Accessible Learning Environment: Ensure that the school environment is physically accessible and that materials are available in various formats (e.g., large print, digital audio, Braille). • Inclusive Activities: Provide opportunities for children with SEND to participate in co-curricular activities and school trips, ensuring necessary accommodations are in place. • Professional Development: Offer ongoing training and professional development for staff to keep them updated on best practices and new strategies for supporting children with SEND.
Audit Findings	Allens Croft Nursery School places great emphasis on creating a nurturing, play-based environment where children with Special Educational Needs and Disabilities (SEND) can grow, explore, and succeed. Staff tailor learning to each child's developmental stage, using differentiated activities, visual supports, and reasonable adjustments so that every child can access the curriculum in a

	<p>way that feels natural and meaningful. Close partnerships with families and external specialists help ensure that each child’s unique needs are understood and supported throughout their nursery journey.</p> <p>The nursery carefully tracks the progress of children with SEND across all areas of learning. Staff gather and analyse progress each term, using this information to shape planning, enhance the curriculum, identify staff training needs, and guide school improvement priorities. Individual Education Plans (IEPs) are created, reviewed, and updated regularly so that goals are achievable, relevant, and reflective of each child’s development. Staff also receive ongoing professional development to strengthen their ability to support young children with additional needs, ensuring that inclusive practice underpins daily routines and play opportunities.</p> <p>Classrooms are designed to be warm, inclusive spaces where children feel safe, supported, and able to express themselves. The well-being of children with SEND is prioritised through close work with the Educational Psychology Service, the use of TIASS-informed strategies, the availability of calming “Regulation Stations,” and the sharing of simple mindfulness practices with both children and families. The My Happy Mind curriculum helps children understand their feelings, develop confidence, and build resilience from an early age.</p> <p>The nursery celebrates each child’s progress—both big and small—recognising achievements across all areas of development, not just academic milestones. Staff use feedback from parents, observations, and assessment data to continually refine their SEND provision. Children are also given support during transitions, such as moving into a new class or preparing for primary school, ensuring that these changes feel positive and secure. Throughout the nursery, staff nurture friendships and promote cooperative play, helping children with SEND build strong, trusting relationships with their peers.</p>
Grade 2026	Compliant
Suggestions to improve/resolve	Maintain existing action and processes.

10.3.10	Staffing & Leadership
Best Practice	<p>Best practice for staffing and leadership for SEN (Special Educational Needs) children involves creating a supportive, inclusive, and well-coordinated environment.</p> <p>Staffing:</p> <ol style="list-style-type: none"> 1. Special Educational Needs Coordinator (SENCO): Ensure there is a dedicated SENCO who coordinates support for SEN children and liaises with teachers, parents, and external professionals. 2. Trained Staff: Provide ongoing training for all staff on SEN issues, inclusive teaching practices, and the use of assistive technologies.

	<p>3. Teaching Assistants (TAs): Employ TAs who are trained to support SEN children in the classroom, helping with individualised instruction and classroom management.</p> <p>4. External Professionals: Collaborate with external professionals such as speech therapists, occupational therapists, and educational psychologists to provide specialised support.</p> <p>Leadership:</p> <ol style="list-style-type: none"> 1. Inclusive Leadership: Ensure that school leaders promote an inclusive culture where every child's needs are met. This includes making SEND a strategic priority and involving all staff in supporting SEN children. 2. Co-Production: Involve children, parents, and carers in decision-making processes to ensure that their needs and preferences are considered. 3. Ethical Decision-Making: Make decisions based on ethical considerations, ensuring that the rights and needs of SEN children are respected. 4. Monitoring and Evaluation: Regularly monitor and evaluate the effectiveness of SEN provision and make adjustments as needed. 5. Professional Development: Provide opportunities for staff to develop their skills and knowledge in SEN education through training, workshops, and networking. <p>Best Practices:</p> <ol style="list-style-type: none"> 1. Clear Referral Systems: Implement a clear system for identifying and referring SEN children to appropriate support services. 2. Evidence-Based Interventions: Use interventions that are backed by research and proven to be effective. 3. Resource Allocation: Efficiently use resources to support SEN children, ensuring that they have access to the necessary tools and materials. 4. Rigorous Assessment: Conduct thorough assessments to identify the specific needs of SEN children and tailor interventions accordingly. 5. Progress Tracking: Continuously track and monitor the progress of SEN children across different subjects to ensure they are making gains. 6. Feedback and Adjustment: Evaluate the impact of interventions and make necessary adjustments to improve outcomes.
Audit Findings	<p>The SENCO at Allens Croft Nursery School has held the position for three years, providing continuity and experienced leadership in the school's approach to special educational needs. They bring a strong professional background to the role, holding a Masters-level SENCO Award, a PGCE with Qualified Teacher Status, NPQH, and accreditation as an Attention Autism Advanced Practitioner. Their ongoing professional development is supported through regular training opportunities and leadership involvement.</p>

	<p>Within the Resource Base, the school maintains a ratio of one teaching assistant to every three children with SEN, ensuring that pupils receive focused and responsive support. All teachers and support staff are trained in inclusive teaching practices and SEN support, enabling them to meet the diverse needs of children across the setting. Collaboration between the SENCO, teachers, and teaching assistants is firmly embedded in the school's culture, ensuring that support strategies are applied consistently and effectively.</p> <p>Staff benefit from ongoing professional development to keep them informed about the latest SEN practices and approaches. Weekly meetings, SEND-focused elements woven through INSET days, and specific training sessions ensure that knowledge is continually refreshed and extended. The SENCO and senior leadership team work together to plan and distribute training so that all staff have access to relevant learning opportunities.</p> <p>The school also takes care to manage staff workloads, recognising that manageable expectations are essential for effective SEN support. Measures are in place to promote staff wellbeing, including regular weekly meetings and supervision. The SENCO also teaches alongside the team four to five days per week, strengthening shared understanding and modelling best practice.</p> <p>Across the curriculum and wider school activities, strategies are in place to ensure SEN support is fully integrated. This whole-school approach helps to create a learning environment where children with SEN can participate, progress, and thrive in all areas of nursery life.</p>

11. Accessibility Plan for Allens Croft Nursery School

Policy Title:	
Date adopted:	
Date of next review:	
SLT Lead:	
Committee:	
Statutory requirement:	Yes

1. Introduction/Context

1.1 The Accessibility Plan addresses the statutory requirements of the Equality Act 2010 (which replaced the Disability Discrimination Act 1995) and the SEND Code of Practice of September 2015. These acts place a responsibility on the Governing Body to ensure that the school is socially and academically inclusive. In particular, the Equality Act requires the school to develop a plan to show how it will develop services in the following three areas:

- a) *To increase the extent to which disabled students can participate in the school's curriculum.*

- b) *To improve the physical environment of the school to ensure disabled students are able to take advantage of education and other benefits, facilities or services provided or offered by the school.*
- c) *To improve the delivery of information to disabled students, so information is as available as it is for students who are not disabled.*

2. Purpose/Aims

- 2.1 The school's diverse and inclusive community will be a centre of excellence in learning, where all students, including those with disabilities, are supported and challenged to fulfil high ambitions.
- 2.2 All students will have access to appropriate qualifications and will develop the skills and resilience to meet the demands of working, family and community life. Students will demonstrate the empathy and confidence to work with others to achieve a better future.
- 2.3 To ensure all disabled students are fully involved in school life and are making at least expected progress.
- 2.4 To identifying barriers to participation and find practical solutions to overcoming these.
- 2.5 To work collaboratively with disabled students and their parents/carers to create appropriate provision, including robust EHCPs where appropriate.
- 2.6 To increase the confidence, sensitivity and expertise of teachers and support staff when teaching or supporting a wide range of disabled students.
- 2.7 To meet the requirements of the Equalities Act and the SEND Code of Practice in respect of disabled students.

3. Definitions

3.1 Definition of Disability (Equality Act 2010)

"A person has a disability if she or he has a physical or mental impairment that has a substantial and long-term adverse effect on his or her ability to perform normal day-to-day activities."

3.2 Definition of Special Educational Needs (SEND Code of Practice September 2015)

A child or young person has special educational needs if he or she has a learning difficulty or disability which calls for special educational provision to be made for him or her. A child or young person has a learning difficulty or disability if he or she:

- a) has a significantly greater difficulty in learning than the majority of others of the same age, or
- b) has a disability which prevents or hinders him or her from making use of facilities of the kind generally provided for others of the same age in mainstream schools. This will include students with medical needs.

4. The Accessibility Plan

- 4.1 This plan summarises our development priorities in the three areas specified by the Equality Act (see context above). The school is also committed to making reasonable adjustments for individual students to ensure all students are able to be involved in every aspect of school life, in partnership with their families, and that barriers to learning are removed.

a) Increase the extent to which disabled students can participate in the school's curriculum

- 4.2 Students with SEND (special educational needs or disability) are given access to the curriculum supported by the school's specialist SEND provision and in line with the needs of the individual and the wishes of their parents. Every effort is made to educate students with SEND alongside their peers in a mainstream classroom setting. Where this is not possible, the SENCO consults the student and parents about proposed flexible arrangements.

- 4.3 The school curriculum is regularly reviewed to ensure that it is accessible to students of all levels and abilities and supports the learning and progress of all students as individuals. This includes learning outside the classroom.
- 4.4 Our Special Educational Needs Policy, Local Offer and SEN Report outline the provision the school already has in place to support students with special educational needs and disabilities (SEND). This includes:
- a) Identification of SEND at a very early stage through meticulous liaison with appropriate feeder schools such as nursery schools, primary schools or high schools, supported by individual provision maps and the SEND register.
 - b) Keeping staff fully informed of the special educational needs/disability of any student in their charge, including sharing progress reports, medical reports and student/parent feedback.
 - c) Listening to students' and parents'/carers' views and taking them into account in all aspects of school life.
 - d) Awareness raising programmes for all students about the range of disabilities in the school, in particular creating a very supportive base for each disabled pupil.
 - e) Regular training opportunities for staff on SEND and appropriate teaching and learning strategies.
 - f) Increasingly specialised in-class support or guidance from trained TLAs (Teaching and Learning Assistants) and Additional Educational Needs Teachers (AEN Teachers).
 - g) Specific specialist intervention to build skills (particularly for literacy and numeracy) in small groups and/or adapted timetables.
 - h) Specialist advice from other professionals (e.g., Speech and Language Therapist, School Nurse, Occupational Therapist, hearing impaired service, physiotherapist) on how to adapt the curriculum and teaching strategies for individuals.
 - i) Special access arrangements for internal and external exams.
 - j) Specific target setting and monitoring to ensure all students with SEND make at least expected progress and accelerated progress in intervention groups.
 - k) Ready access for parents to staff, with partnerships supported by planned structured conversations and ongoing home-school liaison.
 - l) A structured and dedicated transition programme for vulnerable students
 - m) Specialist advice and guidance to support transition
 - n) Multi-agency support coordinated by the school's Inclusion teams in each year group.
 - o) Training for all staff from specialist autism provision staff on teaching and learning strategies for students with autism.

Further development

- 4.5 The School Development Plan sets out additional development priorities in this area. These include:
- a) Create an inspiring curriculum model which meets the needs of all students.
 - b) Broaden choices to construct personalised pathways.
 - c) Develop high quality curriculum for lower ability students.
 - d) Develop more complex curriculum model.
 - e) Conduct annual curriculum reviews.
 - f) Reorganise non-classroom-based support staff to ensure effective context for continuing professional development.
 - g) Improve the physical environment of the school for the purpose of increasing the extent to which disabled students are able to take advantage of education and benefits, facilities or services, provided or offered by the school

b) The school environment already incorporates many features to ensure accessibility to students with disabilities.

4.6 These include:

- a) Any lifts
- b) Any ramps
- c) A specialist SEND area, with small, quiet and calm learning spaces
- d) Any disabled toilets
- e) Features that improve acoustics
- f) Customised furniture and/or equipment
- g) Specialist resources, including digital technologies
- h) Guiding in emergency evacuation.
- i) Any automatic doors

4.7 In addition, teachers are given advice on how to move and arrange furniture, how to manage lighting, noise and visual stimulus, how to create visual timetables etc., so that individual students' needs are met. Similar attention is given to how students' needs can be met on school journeys and visits.

Further development

4.8 The school carries out an accessibility audit every three years in advance of reviewing this policy. The last audit was undertaken by EA Audits Ltd.

4.9 The school is also committed to ensuring full accessibility in any future new build.

c) Improve the delivery to disabled students of information which is readily accessible to students who are not disabled

4.10 Teachers and TLAs consider the needs of each SEND student and provide accessible learning resources for them. The increasing use of Interactive Whiteboards and other digital technologies have diversified the ways in which information is presented to all students. Visual and audio information is now as common as written information.

4.11 In addition, the school makes the following available as appropriate:

- a) Differentiated resources with particular attention to reading age, plain English, images and layout.
- b) Laptops and other digital technologies.
- c) Coloured overlays for text.
- d) Tactile resources.
- e) Readers and/or scribes in exams, where appropriate

Further development

4.12 The following opportunities to improve further will be explored:

- a) Opportunities provided by digital technologies.
- b) Regular clear and relevant information to parents in home language if required.

5. Responsibilities

5.1 All staff are responsible for removing barriers to learning for disabled pupils.

5.2 All leaders are responsible for improving accessibility within their area of responsibility.

5.3 The Governing Body is responsible for the approval of this plan.

5.4 The Head teacher is responsible for ensuring the resourcing, implementation and updating of this plan.

5.5 The SENCO is responsible for ensuring that all current students' needs are covered by this plan and for monitoring the effectiveness of the plan in meeting disabled students' needs.

6. Review

6.1 This Accessibility Plan has the status of a policy of the Governing Body and is reviewed every 3 years. The views of disabled students and parents will feed into the review.

12. Key to Action Plan

12.1. Priority Ratings

It is unlikely that you will be able to implement all the recommendations in the near future and we do recognise this. To this end a priority rating is given to each recommendation, which is designed to guide you in the formulation of the accessibility plan, which then can be incorporated into the school accessibility strategy and your School Improvement Plan (SIP).

Priorities for action may be dependent upon a range of factors including, for example:

- Compliance to AD M (Part M of The Building Regulations)
- Client's policy and objectives
- Current use of the building
- Costs involved and available budget and resources
- Plans for refurbishment
- Maintenance programmes
- Agreement of outside agencies (such as a free holder or local highway authority, planning permission)

It is for the schools' senior leadership and management to take ownership of actions to improve accessibility, in the context of the many competing demands schools face. The priorities suggested below may be helpful in that regard.

It is suggested that the schools' own development and improvement plan (SIP) contains targets linked to this Accessibility Action Plan, to encourage allocation of staffing and budget resource to support further improvements to accessibility.

Priority A:

Where there are potential health and safety risks or where failure to implement changes would be highly likely to attract legal implications. Immediate action is recommended to put changes into effect.

Priority B:

Where action is recommended within the short term to alleviate an access problem or make improvements that will have a considerable impact.

Priority C:

Where action is recommended within 12 - 24 months to improve access.

Priority D:

Where the recommendation involves excessive costs or should be implemented as part of a long-term plan.

12.2. Budget Implications

Potential budget costs have been suggested. Especially in the case of higher budget suggestions, it is recommended that quotation and tender exercises are undertaken in compliance with the schools and funding bodies financial regulations and appropriate budget allowed for at the point of preparing the school's annual expenditure budget.

N - None

Such recommendations are likely to be achievable with no revenue cost to the school.

OG - Ongoing Maintenance

Such recommendations are likely to be achievable within annual revenue budgets for annual maintenance as part of the annual planned preventative maintenance programme.

L - Low

Such recommendations are likely to be achievable for a budget of less than £1000

I - Intermediate

Such recommendations are likely to be achievable for a revenue budget of between £1000 & £5000. Such action may need allowing for at annual budget planning time.

H - High

Such recommendations are likely to be achievable for a capital budget cost above £5000. Such action will probably need allowing for at annual budget planning time.

ST - Structural Change

Such recommendations are likely to require a budget exceeding £15,000. Strategic Budget and Project planning at a professional level of support are likely to enhance delivery of the desired change.

13. Action Plan

13.1. Access to Information							
Audit Ref	Audit Item	Suggested Actions	Priority	Budget Implications	Target date for completion	Ownership of Task (School to insert name)	Date Completed
10.1.3	School website and social media content	Publish a clear and accessible Accessibility Statement on your website. This will ensure the school meets statutory digital-accessibility expectations, demonstrates its commitment to inclusion, and provides transparency for parents, carers, staff, and visitors who rely on assistive technology or alternative formats. Including an Accessibility Statement also helps users understand how to request support, report barriers, or obtain information in a different format, ensuring that the website is usable by everyone and reflects the school's wider inclusive values.	C	N	ONGOING		

							
10.2.10	Accessible Toilets	<p>The accessible toilet in the nursery is now used as a storage facility and so the sign should be removed from the door.</p> <p>Check that all accessible toilets have coat hooks, a shelf for belongings and a mirror at an accessible height.</p>	C	N	ASAP		
			C	L	2026-2027		
10.2.13	School Signage (Internal and External)	<p>Review internal signage and ensure it is all in both uppercase and lowercase lettering. Consider adding an option in Braille. For example:</p> 	C	N/L	ONGOING		
10.2.20	Staff Facilities	Provide at least one high backed chair in the staff room.	C	L	2026		

13.3. Access to Education

Audit Ref	Audit Item	Suggested Actions	Priority	Budget Implications	Target date for completion	Ownership of Task (School to insert name)	Date Completed
