Car Park Access

Dear Parents and Carers

The car park that we share with National Health Service (NHS) and Primary Care Trust (PCT) colleagues will be significantly reduced in size for the duration of the week beginning 17th October 2022, due to the installation of a new bin store.

Please note that we discourage parents and carers from using the car park for the dropping off and collection of children, with the exception of drivers with a disability or those collecting a child with a disability, that necessitates close access to the building. The car park is also used throughout the day by heavily pregnant women, as we have a midwifery team based within our premises.

Please help us to ensure there are spaces available for those most in need, both during this period of works and every day throughout the year. Thank you in anticipation of your support.

Yours faithfully

David Aldworth

Executive Head Teacher
